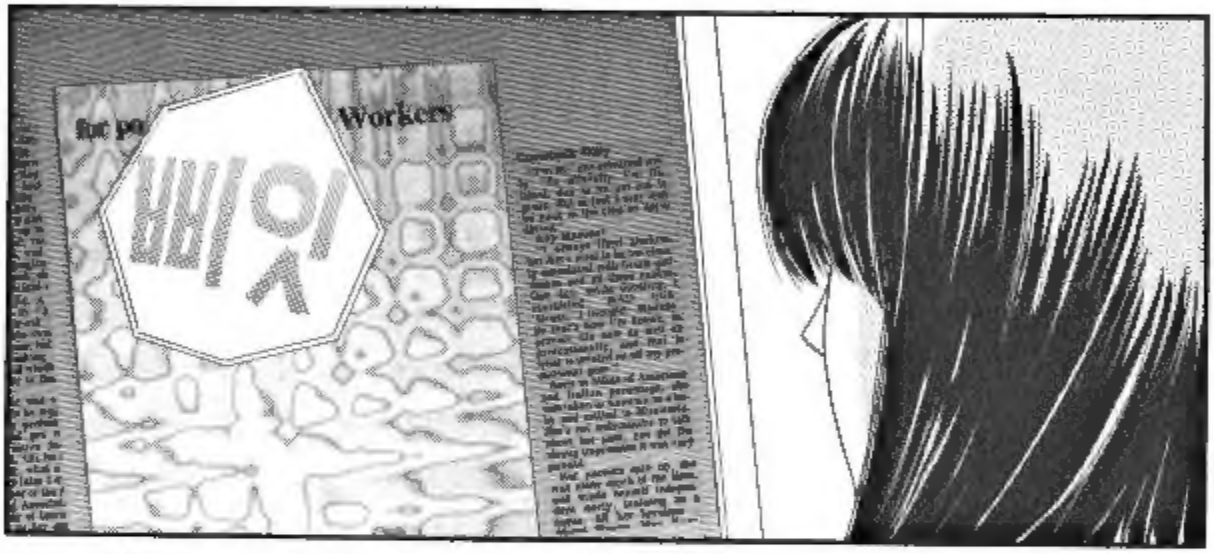
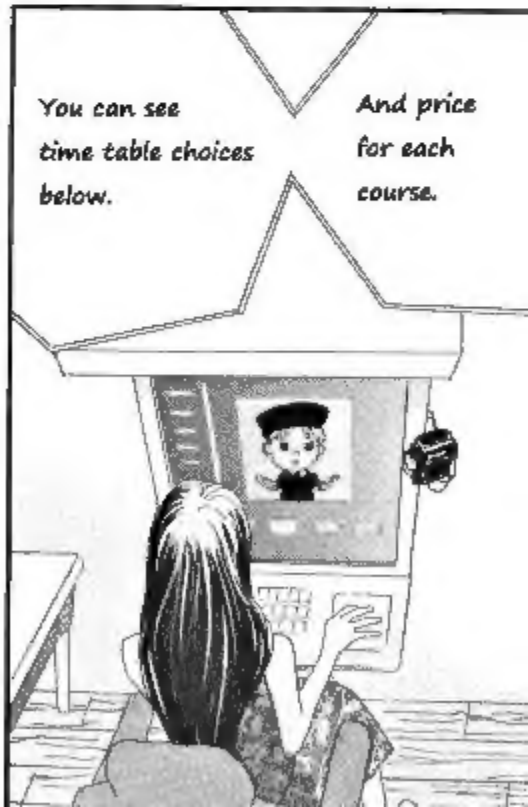
Gravity training center.



Workers

Hello, I am Tony, an adviser of Gravity training center.
I am a family member of G zone crew. How long does it take for Moon gravity training?

There are a 3-week and a 2-week courses
If you are in hurry, there is also a 10-day course.



You can see time table choices below.
And price for each course.

If you'd like to register, please click the proceed button and fill out a form.

The course will start a day after your registration.

...

Talk to mom before doing this ?

It isn't cheap.

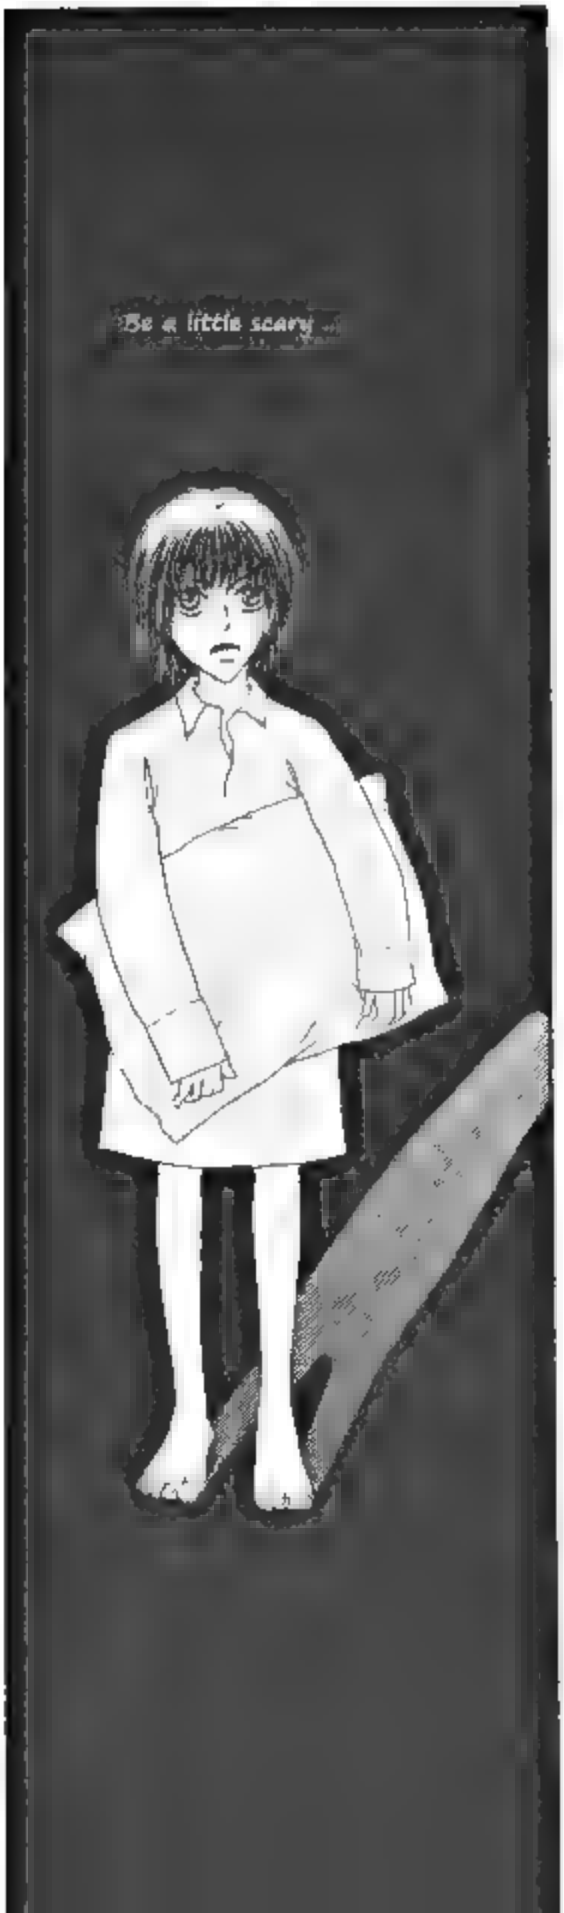
Or just do this ?

I have some savings.

Would he ... spend all of his time in that zone alone ?

No family, 그리고 And completely 완 surrounded by stransgers 그리자—

Wouldn't that ...



Be a little scary ...

삐이익!
Yes ?
What ?
I will be right there.

I am sorry, but I must excuse myself now.
It's an emergency call.
Ah -

I leave tomorrow morning
I will be back once my work hour is over.
If you'd like, how about dinner ? Though I may be late.
Dinner .. Sounds good.
Ah, and ..
I will bring a boy with me to dinner
A boy ?
Yes, I've taken him for a while.
I feel sorry that he has to eat meals alone always so ...
Ah ! The Moon boy. Laterasa, isn't it ?
You do know.
Alright, bring him.

I wanted to meet him as well.
Captain !
How did it go ?!
Has the bomb been disabled ?!
Have the terrorists been captured ?
Ah !
I just came back from the COSMO police.
The bomb has been disabled, but the terrorists are still loose.
So, it's alright now ?

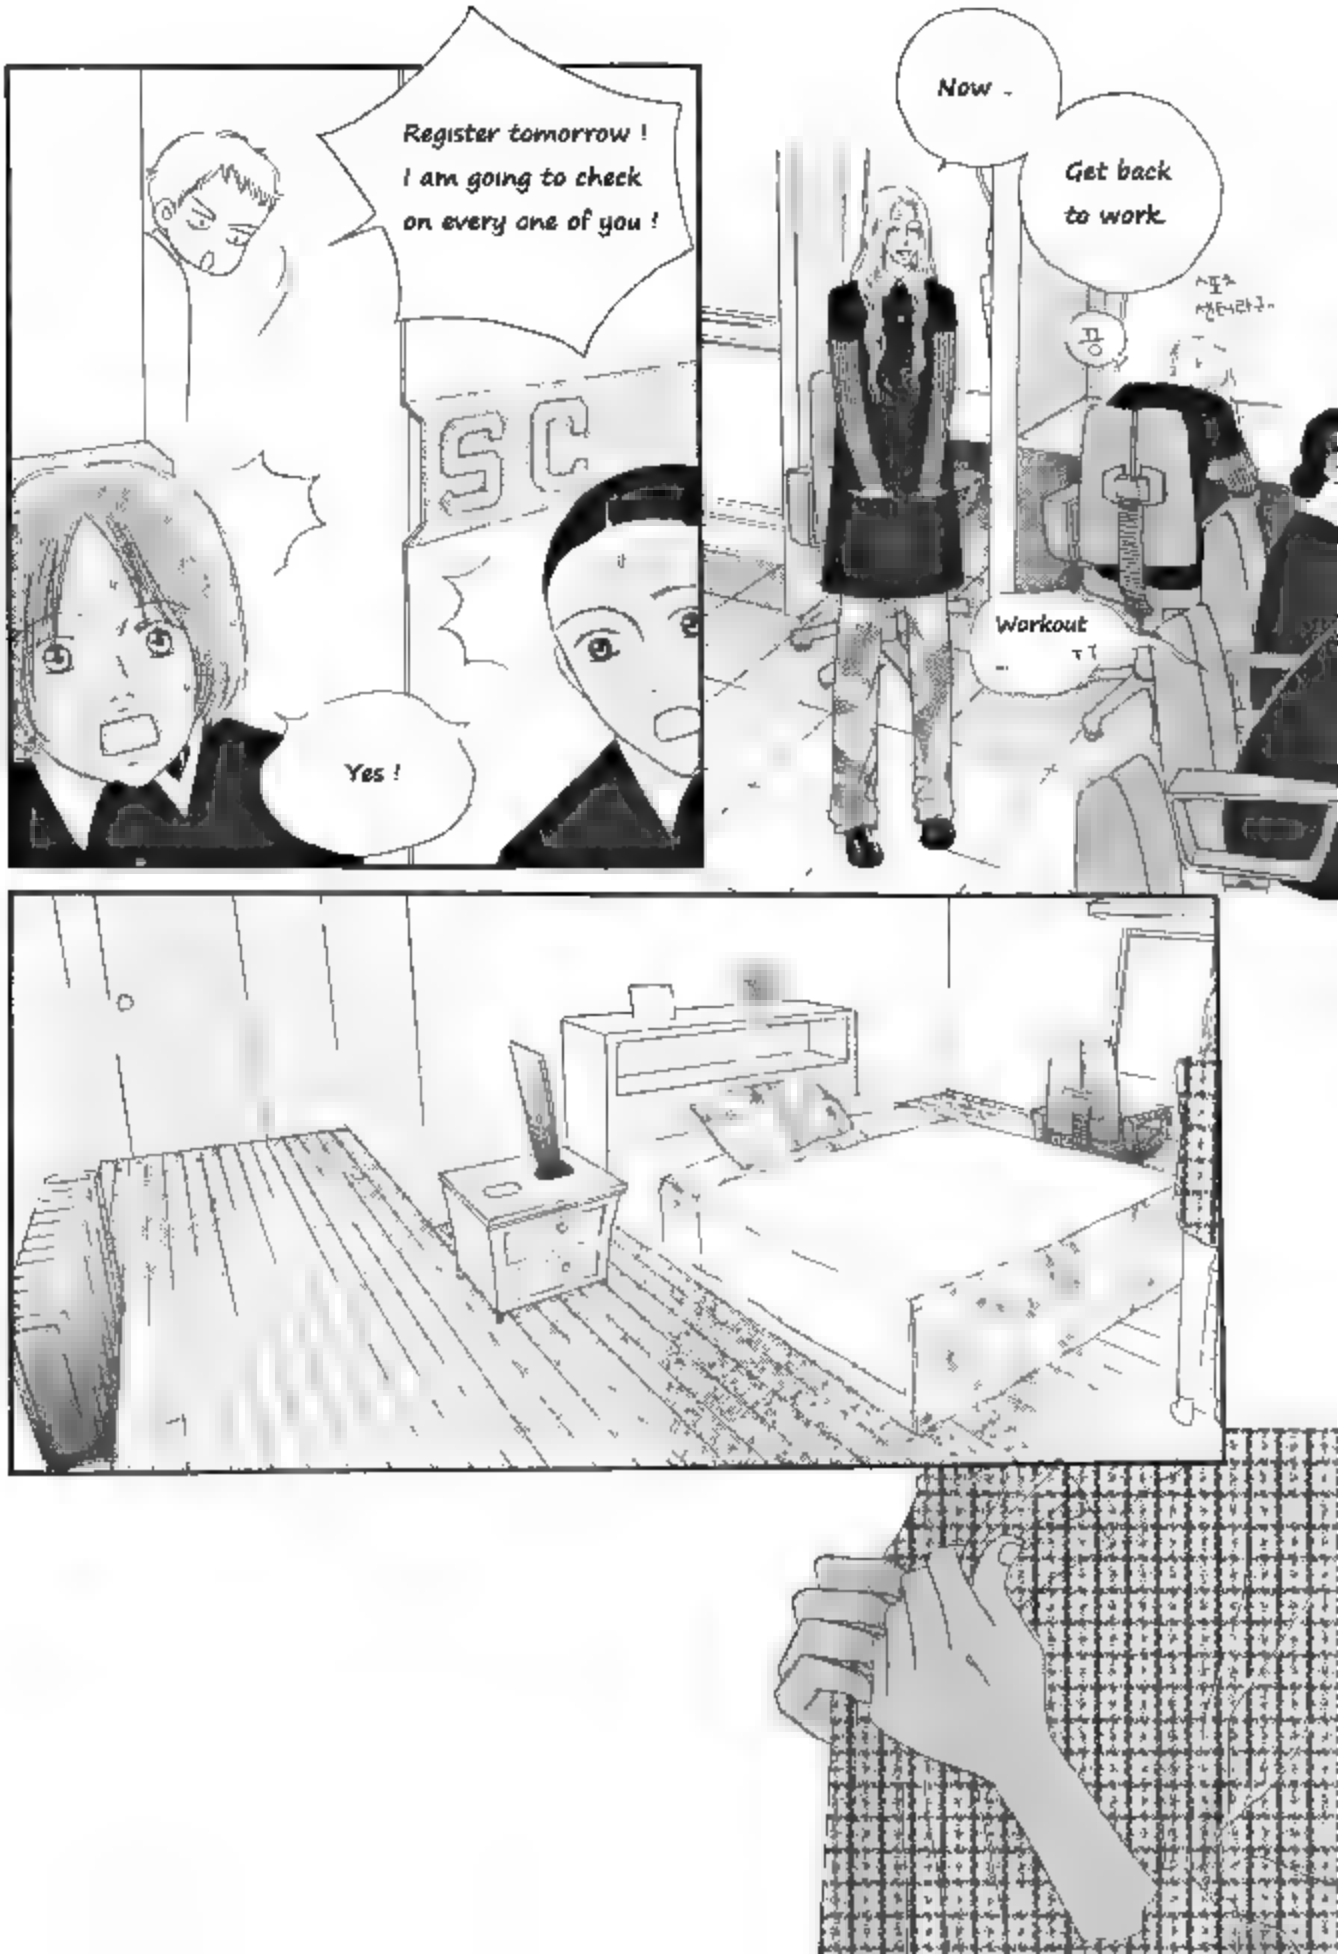
Yes.
So now, get back to work.
자자 일들 해요 일들
And I was told that they did not target us.
It would seem that they planted the bomb to attract attention.
The bomb ?
Doctor -
What are you talking about ?
They didn't notify the doctors ?
It's nothing. What brings you here ?
Was there a terrorist action ?
Yes, but it's been resolved, so don't worry.
I've come here to deliver result of this month's checkup.

Hmm ...
Everyone seems to be here.
Everyone will get their records.
The reason I am here is however ..
Captain, calcium in your body has been reduced by 0.5 %. Weight reduced by 0.3 %.
Vice captain, you lost 0.75% of your muscles.
Mr. Parker, you lost 0.6% in calcium and gained 1.5% weight.
Mr Cox, you lost 0.8% muscles.
In other words, your health conditions are getting worse !
Mr Cox, what do you do after work ?
Eh .., Well

I, uh..., watch simulation movies and download stuff from the net
Hmm ...
Sports center ?
I remember you telling me that you'd register.
I, uh..., didn't have time.
"Didn't have time" ?
How many hours do you spend watching those movies everyday ?

Not much ..
5 or 6 hours ..
Oh?
I want you to work out an hour everyday.
I am going to check on you, so you can't get out of this.
This applies to the rest of you.
An hour of work out before or after work is required. Do this at least 3 times out of a week.
Just take a simple course at the sports center
Especially those who have to travel between normal and low gravity area ...
I am talking about you two !
So, it's nothing serious.
I am leaving.

Jion !
Yeah ?
I put you in charge of getting captain to work out.
I can bet that she is those who hate to work out.
Everyone, got it ?
Is this okay with you ?
Why do I have to do that? I don't want to work out
Yes.
I am leaving now.



Register tomorrow !
I am going to check
on every one of you !
Yes !
Now .
Get back
to work
Workout

Grandfather,
I ...
I wanted to see
Moon from
surface of Earth.

I ... wanted to feel sunshine ..
I ... wanted to see the sea ..
I wanted to fly through clouds ..
Why can't I ?!
Why are we not allowed to do such ?!
.. I know it's because ..
We might die from trying those ..

But I may be alright
Over here, Laterasa.
And this is -
Say hello to -

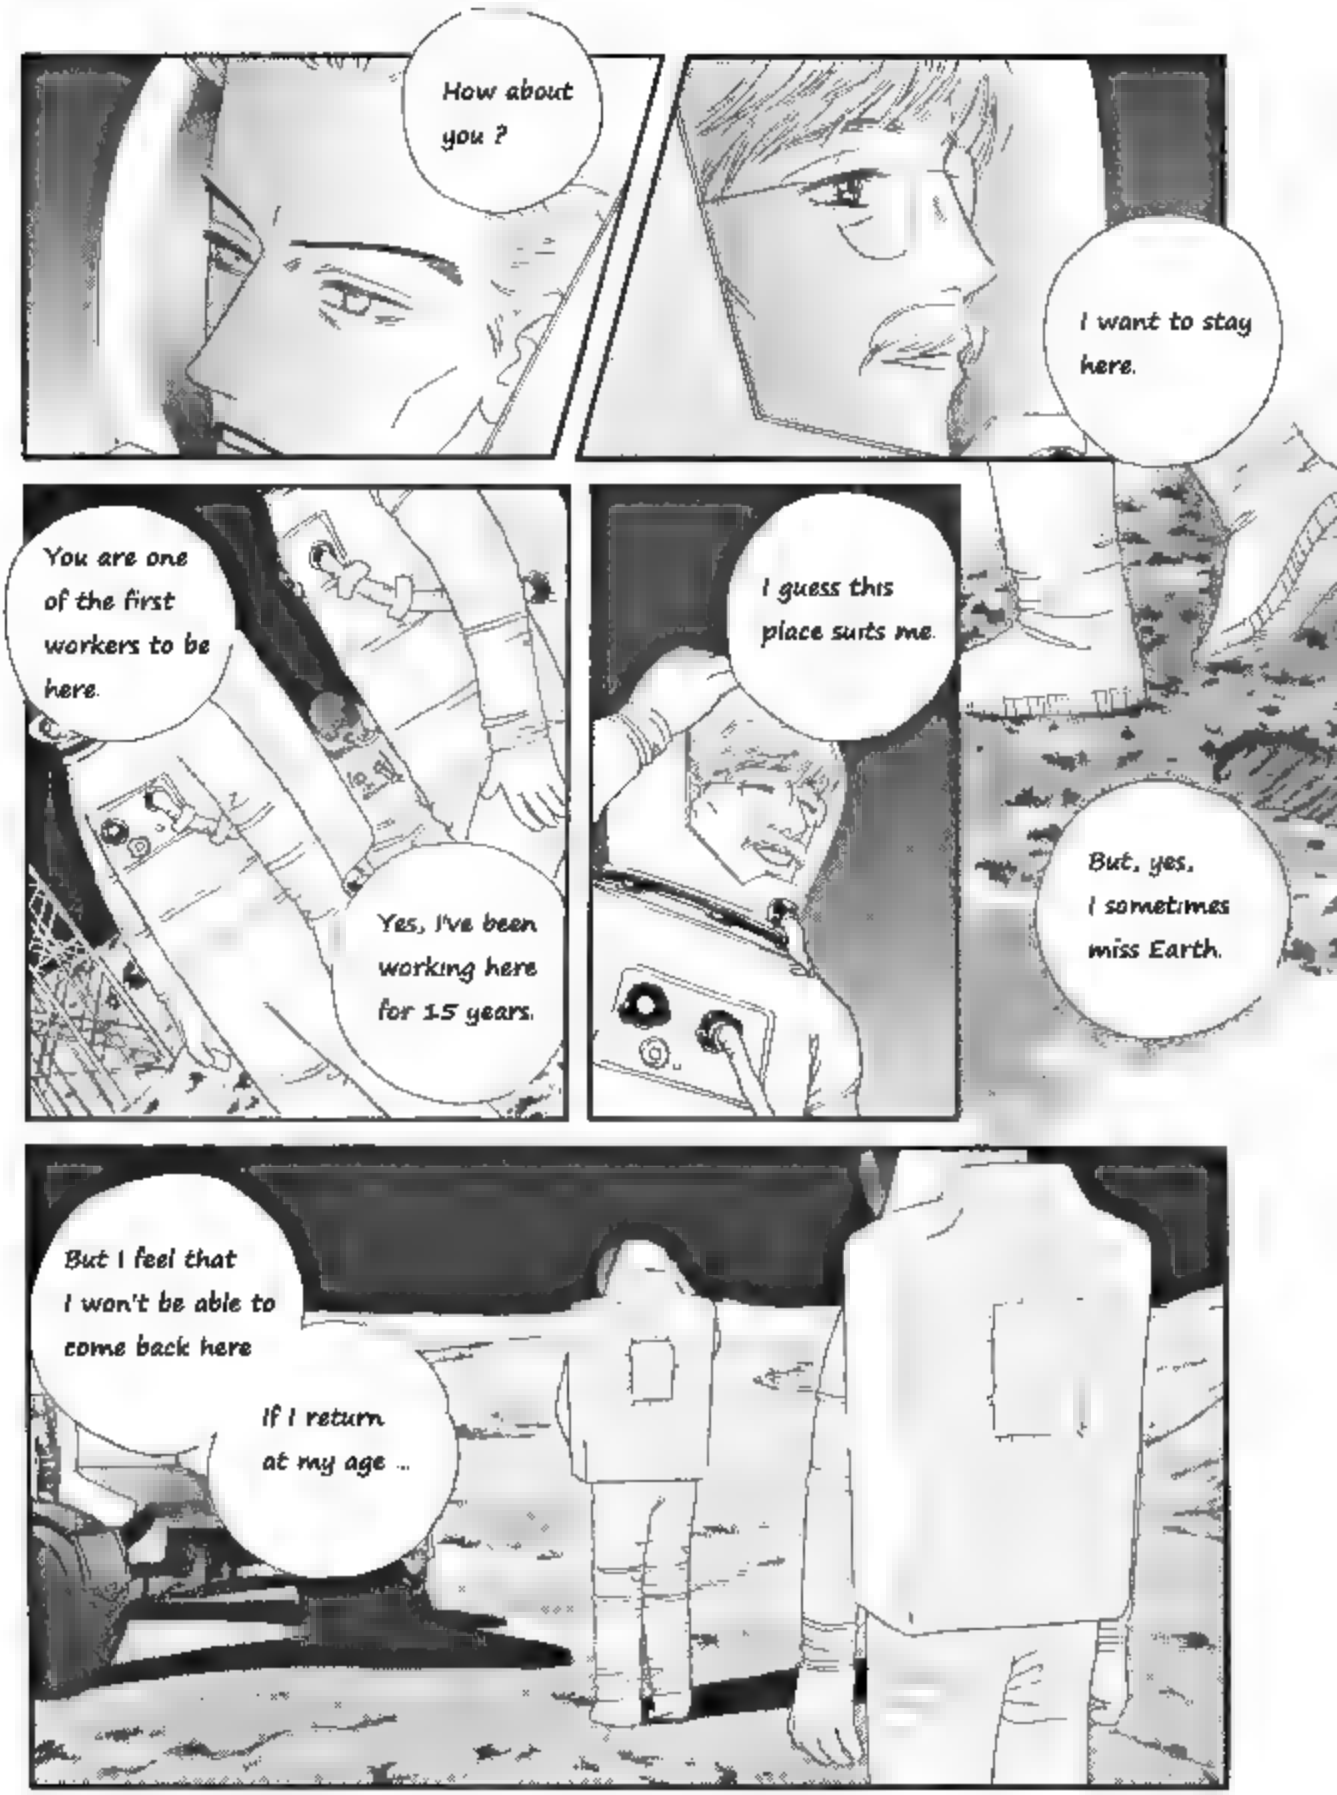
Arthur Maxwell.
Yes ..
I am Laterasa.
Laterasa Uko ?
Yes ..
I met your grandfather when he was still alive.
We shared the same name, so I remember him well still.
He was an honest man.

Ah –, pick anything you want from the menu.
.. I have no idea what these are.
I will choose what you choose, ma'am.
How about this then ?
It's sea food .

There are only stars here, no Earth and no Moon.
Oh ... !
This spot is said to be the closest to Earth.
Still Earth cannot be seen from here.
The sky is ... a bit like night sky of Earth.
So, I'd like to think that I am on Earth.
But the harsh conditions here break that little dream I wish to keep.

And this is only Moon. I think the others realize that as well.
And they are feeling depression.
Including you ?
No.
Though I sometimes wish that Earth could be there to be seen.
Sometimes -
It's beautiful.

And lonely.
Humans are meant to live on Earth.
Due to our greed and desires, you become loner
How many years do you think people can work here ?
Few could work here forever
Though majority should go back after 2 years.
Unless they risk going insane.



How about you ?
I want to stay here.
You are one of the first workers to be here.
Yes, I've been working here for 15 years.
I guess this place suits me.
But, yes, I sometimes miss Earth.
But I feel that I won't be able to come back here
If I return at my age ...

The last part of the conversation sounded like he was talking to himself.

As if he was giving himself an excuse to stay.

Or perhaps he was comforting himself with those words.

They call you "Soul Identifier" on Moon.
You can read souls ?
Reading souls ..
Well ..
No.
I cannot see such.
Would that mean you are able to see ... things that no one else can ?
I can see nothing.

I do not see such.
I simply ... feel things.
Colors, shapes
Touch
Those are not something I can explain in such terms.
And such ... just come to me without my consent
Like an image you still see when you close your eyes.
Like a desperate scream you still hear when you block your ears.
Like those -

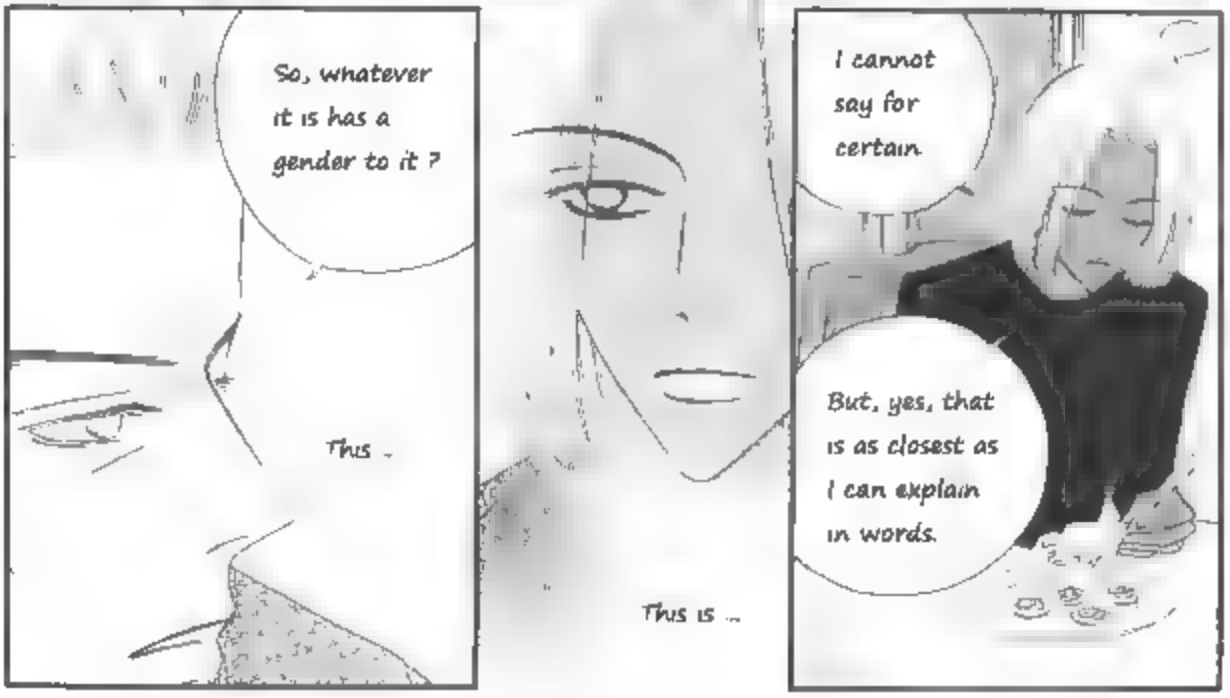
Such flow into me, and I understand what they mean instantly.
It's like ... many unknown things are lined up on ...
a field that is as thin as a piece of paper ..
No..., that's not it ..
It feels .. as if a world passes through my body.

Hmm ..
But that does not change anything at all.
Such experiences
Just because I can distinguish "that" ..
It does not change anything
There are few others besides me who can feel such.
Did he just say "Distinguish"?
But in their cases, they simply feel.
Not those "I can see", "I can feel", but "Distinguish" ?
In my case, I can distinguish.

Like distinguishing fingerprints.
Like distinguishing shape and color of iris.
Is that why they call you soul identifier?
It was a nickname I was given at a facility I was in.
The nickname ... is half a joke.
Joke ?
"He (The kidnapper) was forcing the Moon boy to stay in a research facility for past 2 years."
Ah, yes.., he did mention a research facility.

I heard there is a profession where one identifies gender of chicks on Earth ?
Yes.
They said it was the same thing.
The same thing ?
Yes.
I distinguish gender of "it"
Are you implying there are genders in souls ?

I do not know what it is.

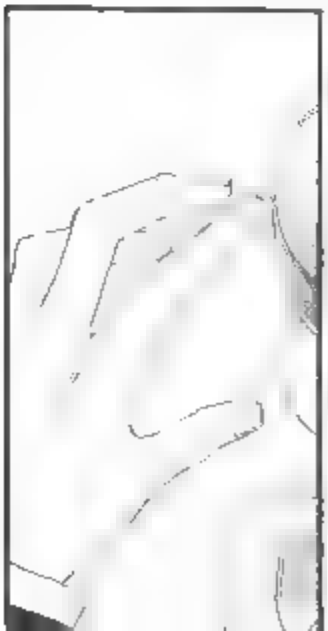


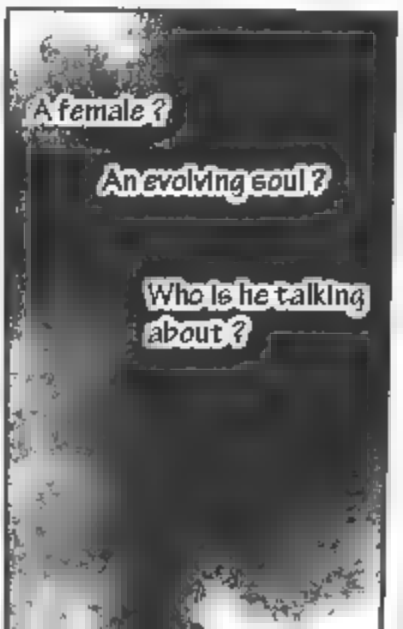
This is worthless.
Well, every soul is different
He looked matured for his age, so I expected a little more ...
I really did not expect to hear such ... non-sense from him
Oh, well
Not one soul is identical to each other
They are all so ... unique.
Meeting Diotima herself was good enough.
It's perhaps like our bodies. No physical body is the same.
We are all different
All too different

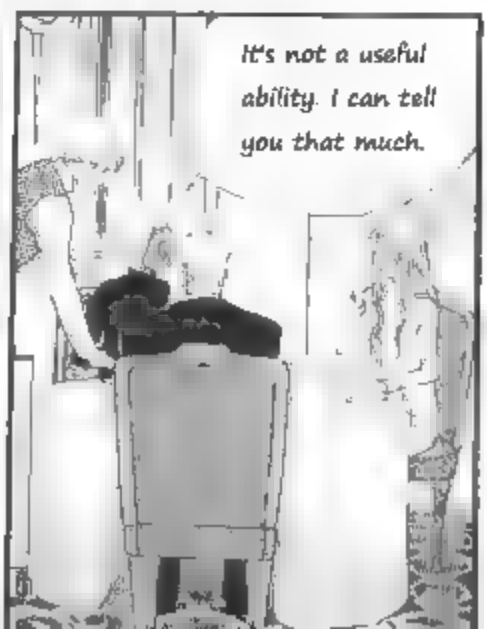
They can never be the same.
Grandfather said that is why we feel sometimes lonely.
Oh, my ! Souls with genders !
I can see where you are coming from. Yes, it's hardly souls.
We should call it something else.
Sometimes -

I feel that it tries to climb up in time.
But its essence does not change.
But... my grandfather told me that he saw an evolving soul ..
He was it was the first time that he saw such a soul
He said repeatedly that what he saw was real and the soul was evolving.
Such a soul .., such a female, it was his first time in his life, he said.

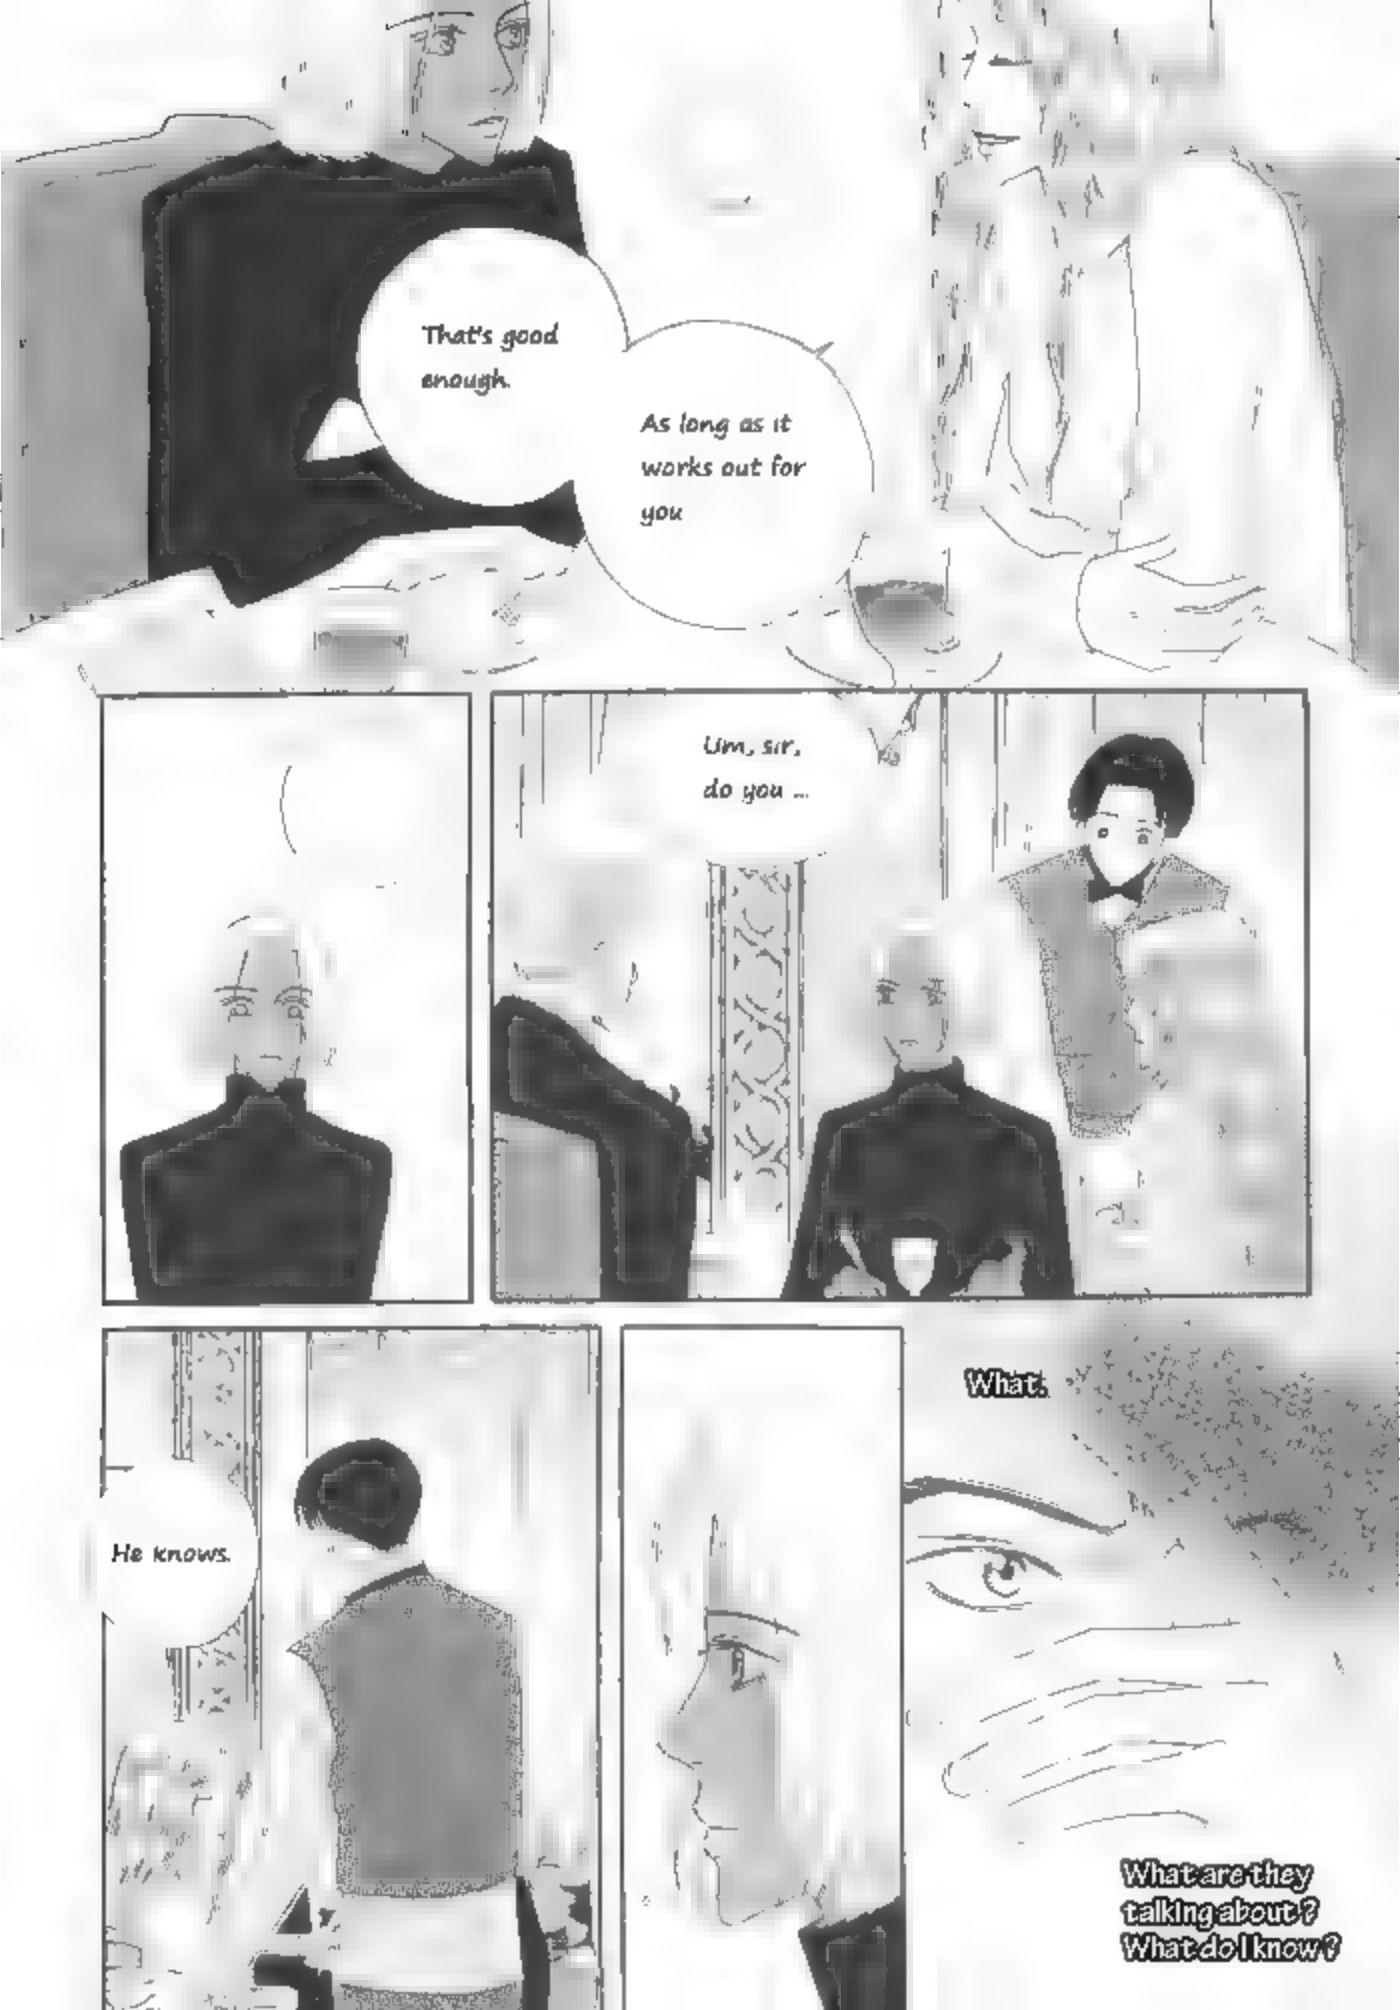
He said that she was a soul that did not hesitate to move forward.







I cannot read people's mind.
I cannot tell what kind of people they are.
Just ... some weird info comes into me.
It stays for a while and goes away
Mr Gordpri (The kidnapper) wanted to use my ability scientifically.
Have you ever felt sad due to your ability.
No, I have never
Though I've felt sorry for others
Because my ability is useless to myself and to others, and they wanted to use it.

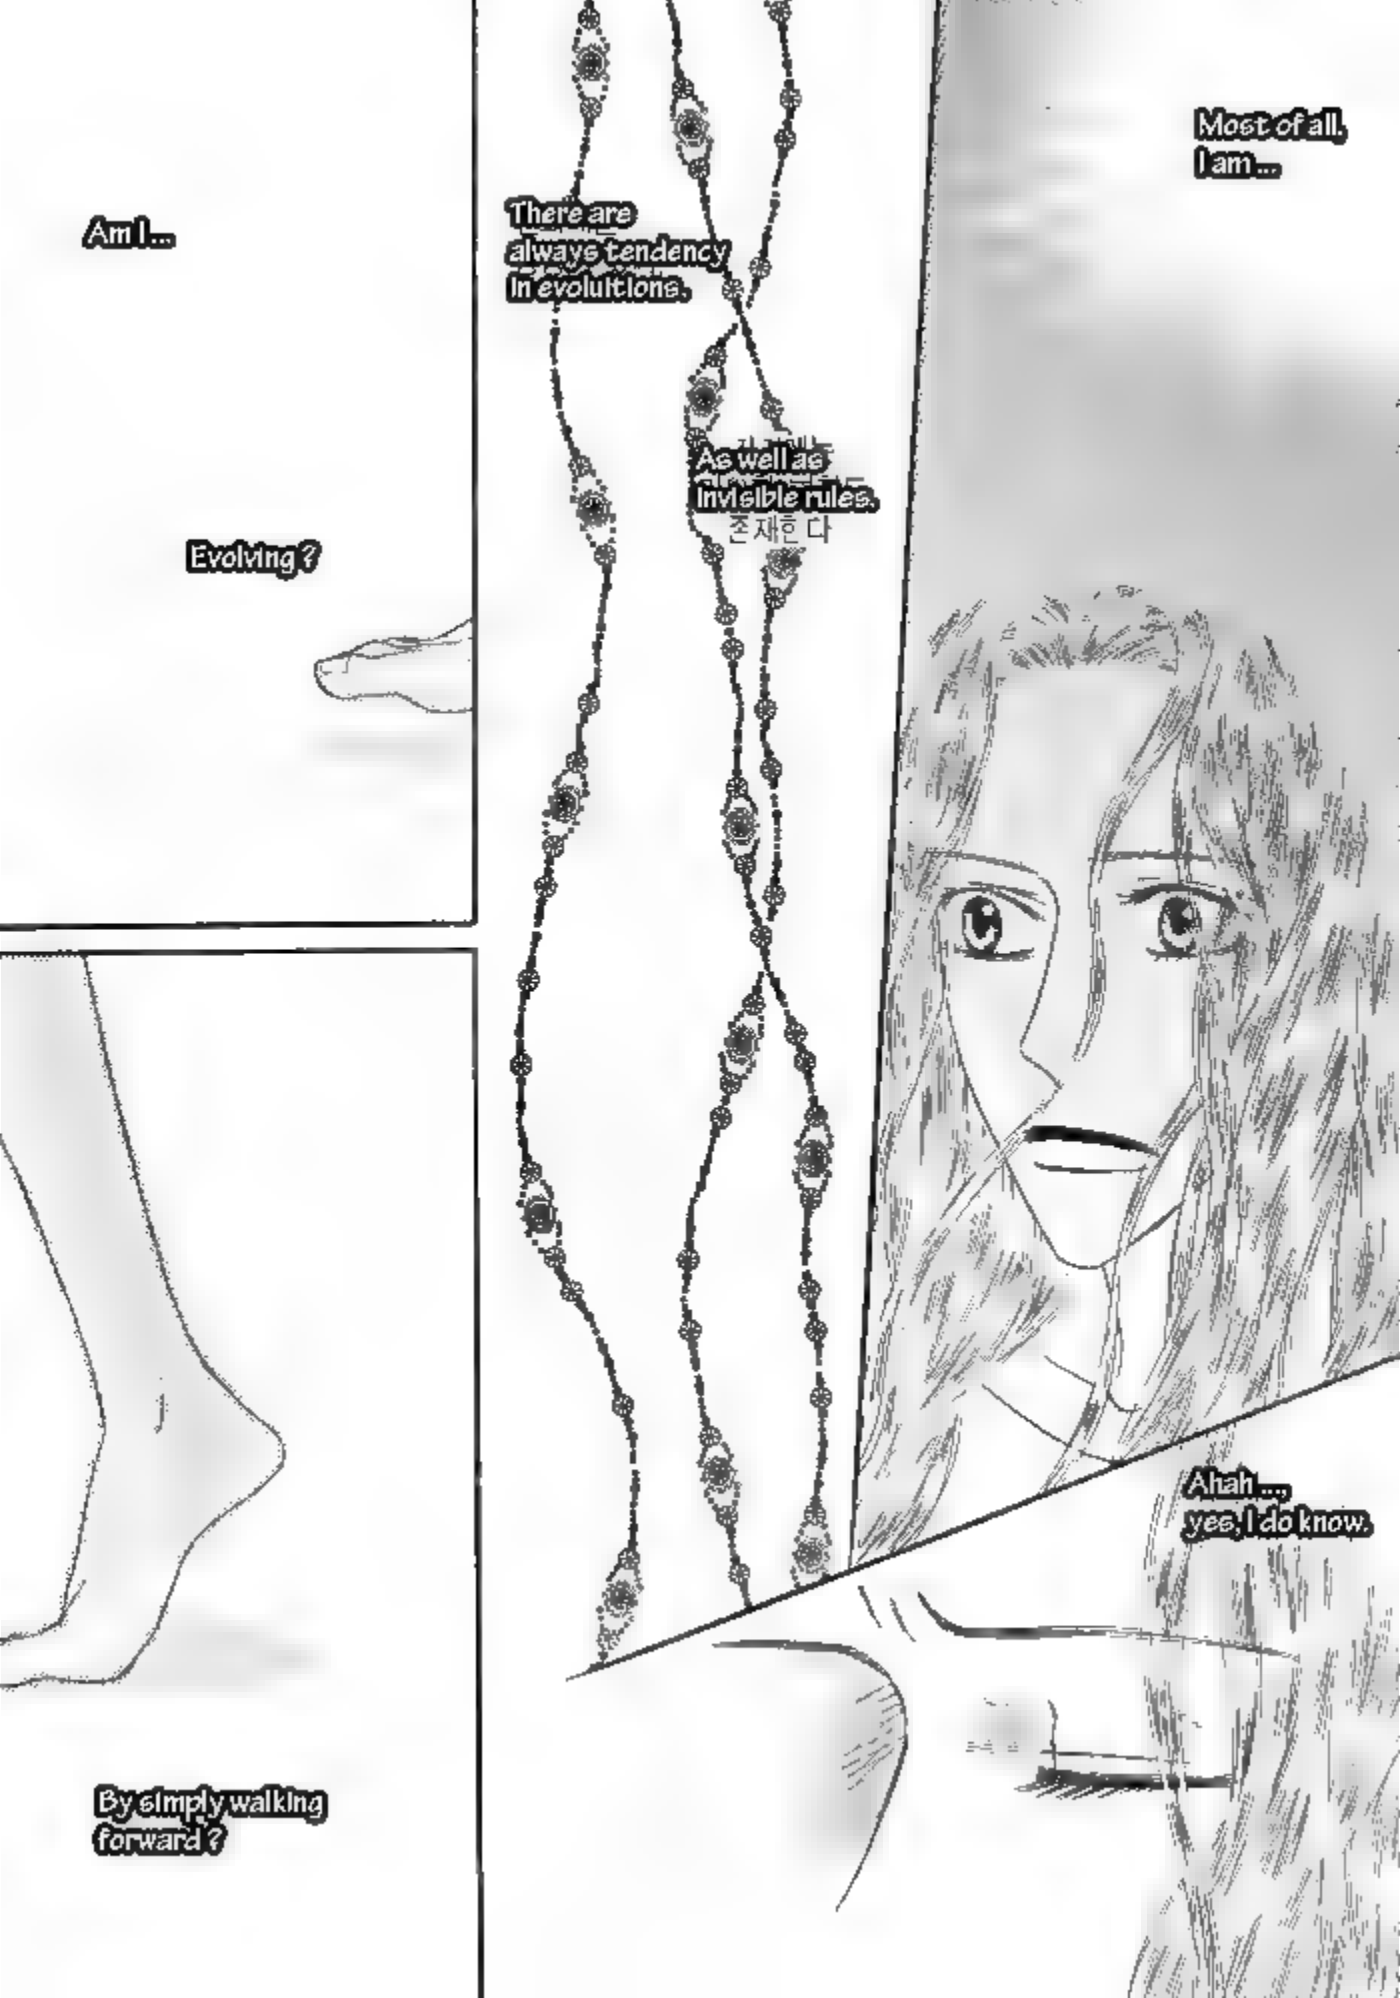


That's good enough.
As long as it works out for you
Um, sir, do you ...
He knows.
What.
What are they talking about? What do I know?

What did they mean?
All I know is...
simply...
Simply...!

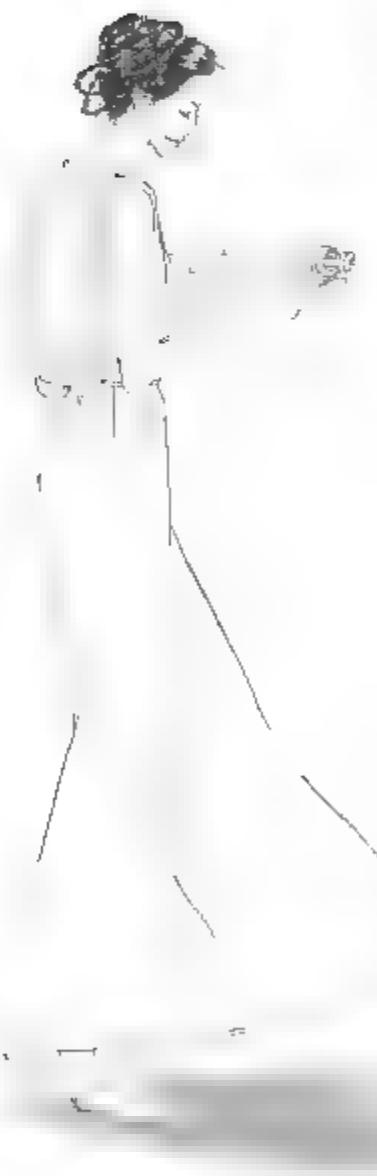
My gender has always been female.

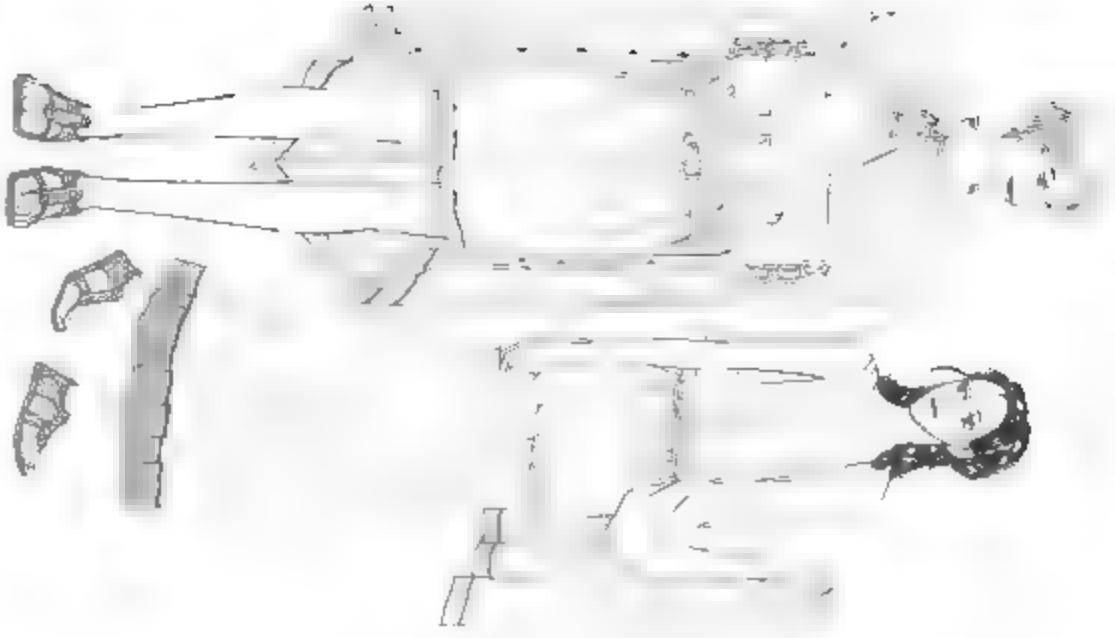
It's something which I've always been absolutely certain.



Most of all,
I am...
There are
always tendency
in evolutionе.
As well as
invisible rules.
존재한 다
Am I...
Evolving?
Ahah...,
yes, I do know.
By simply walking
forward?

Yes...
I have already realized when it happened.
The meaning of death...!





Ugh ..
Argh ..
Uhh...
Aristarchos ?!
What's wrong ?!
Ah ?

Dream...
A night mare...
It's alright now.

Alexandria (1)

Are you ready, captain ?
I am coming.
Ah..
Small luggage.
Let's go.
Have fun, captain.
Have fun, vice captain.

It's for 2 days.
I will leave it to you.
Don't worry, ma'am.
See you next week.
Have fun, you two.
It looks like a honeymoon trip
No, it looks more like a mistress and her slave.
How come he has a lot more luggage ?
I wonder how it is like to marry on Moon.
On Moon, you say?
Not much different, I'd say.
They get married in a church under a dome.
There were cases where couples got married in space suit, but that's old.

Don't they rent a space ship ?
Do you know how expensive that will be ?
None of us could afford it.
Let me see how much it will actually cost
Why get married on Moon at all?
Romance, so to speak.
Hmm ..
Passengers, please determine your up and down with your seat.

Please tighten your body to your seat
Ah ! Would you like the window seat?
No, it's fine.
It's our first time.
We should have gotten better seats.
It's small and uncomfortable, isn't it
It's enough, Jion.
I had no idea that it would be so full.
It's booming
In the worst case, I was going to ask for a Hyperion.
You know the tugging ship, right?
Hyperion? Its interior is very small
Barely enough for 2 or 3.
Really ? Have you ridden it?
I have not..
Me, either, so I don't know. Heheheh.

When moving, please use the handle on top in order to avoid colliding
Excuse me
Again, this shuttle has top and bottom. Where seats are is bottom.
Eh...
We are on a trip
I am excited
Do you like trips ?
Yeah.
Wait...
I am not sure.
How about you ?
I ., uh ...
I don't hate it.
It's just that I'd rather spend my time doing essay.
So, you dislike it

I guess you are right
Yes.
I don't think I like to see my surroundings change too much

Is that so

For me
I don't mind as long as it's places I don't want to go.

Still, I am excited.
It's Moon after all.

Yes, I am excited as well.
Ah ..
Earth ..
Yes ..
In Diotima, we don't get to see real space often.
It's been a long time since I saw real space.
I think the reason space looks so beautiful is perhaps due to Earth.
Over there. , everything for us is over there.
Compressed in a small blue dot

It was when we were going to Diotima for the first time.
When our shuttle entered orbit and seals on windows were taken off .
Everyone became silent
I am sure that
They were in their own thoughts.
Earth !
Diotima, it's Earth !

Ahah -
Benjamin once said that everyone will be a poet when they see Earth from space.
JaKyme S

This is truly ...
Hmm..
On Earth, where are you looking at ?

Alexsandria
Alexandira
Yes ?
Nothing -

Ah
You know that new crew will arrive on the day we get back, right?
Yes, we will be opening powered down sectors.
Medical crew have to start working right away.
Yes, I've heard.
And I've also heard that they will be independent
Ah, that ...
They are planning to do so in order to provide them with a better structure.
Well, doesn't it look like Diotima is becoming more like a space medical station ?
Well, they will likely use sections we don't use.
And it is the most important of all.
They are probably trying to make a strong stand before Hextilin's station goes online.
Are we turning into a space hospital ?

Sorry, I got a little carried on.
Well ..
Well, our company is a space transport authority.
To make it worse, due to RedRaccoon, this company doesn't look very unified.
To be honest ..
I even heard a rumor that the company is going to be turning public
So, I was a little sensitive.
I see
Don't tell me the rumor is true ?!
No, it's the first time I heard it.
Really ?
But it is possible...
Is it due to their red figures ?
We will depart soon. Please remain in your seat and equip your seat belt.
But from what I hear ..

CSC is building an orbit elevator but the project is on hold.
Yes.
That's because
Ah..
Nevermind. It's going to make you feel only worse.
Never mind.
Yes ?
What ?
Catch your hair.
Anyway..., Jion, collecting space debris and maintaining satellites will be our primary task even in the future.
Space in our vicinity is already full of debris and they keep shooting satellites into space.
And humans will need more places to rest than they do on Earth.

Anyway, let us have a faith in our genius president.
His IQ is 220 He will manage
탁
Sure ~
And I heard rumors about you and hum ...
It's good that you are easy going.
Do you ever have concerns or something ?
What ?
I always worry about the future of man kind.
씨익-
Ah ~ Is that so ~
Actually, I lied.
I know !

Concerns
Mines are ... too late to worry about
"Diotima!"
They can no longer be corrected
"Milady! You've returned!"
"The madam is at the olive field."
"Diotima! I missed you."
"Helena?"

You didn't let us know.
You are staying here ?
He said I could stay here.
It's been 2 months.
You've returned.
It's been a year

Father
I heard the news from Athens.
I thought I might have to prepare some money this time.
No, at least not yet
He wanted to say hello to you.
Hmm ..
You get to live only once. Live however you wish.
Enjoy your stay while it lasts.
I have a friend to meet today, so I will be late.
You and him, really.
It's been some time and that's all the greeting you two have ?

Why aren't you with your lover ?
He did ?
A young man with very bright future, Admetos said.
Yes, he went to Athens few months ago.
Panasus ?
Yes ! That's the name.
He is just a friend.
What ? No way.
Words spread. the best student at the Akademia has fallen in love with a young woman from Alexandria
What .. ?
Did he purpose? Will you accept?

Did you refuse ?
He's a friend.
We got along okay.
A false rumor ?
But such a rumor - it's bad for you
"Diotima, marry me."
"I feel that I will be able to have a bright future with you."
"I love you, marry me."
"Dreaming the future with you was the happiest moments for me."
"We will be able to spend many years talking like this."

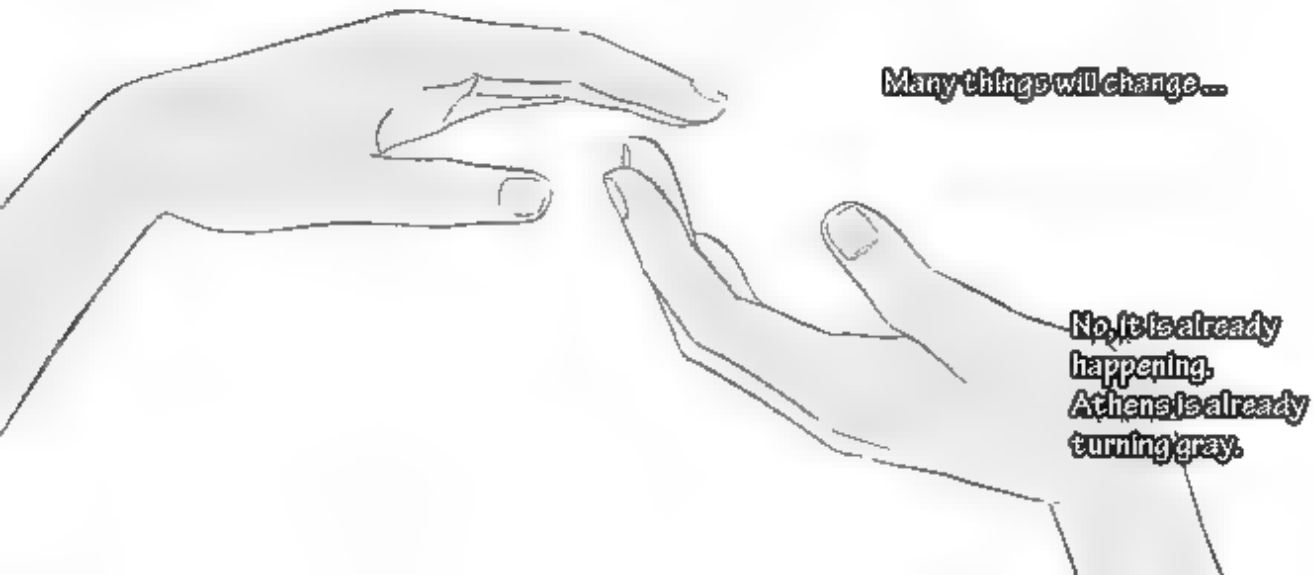
He was certainly the most appealing man and the smartest in the group...
It was true that I was attracted to him for a moment...
He was born in a wealthly noble family in Athens, and he grew up with high expectations and much love.
And therefore, he had high pride and dignity.
And he was accompanied by fitting manner and intelligence.
With his humorous nature, he would make his life pleasurable and exciting.
But why was I unable to imagine myself into the picture?

I do like him.

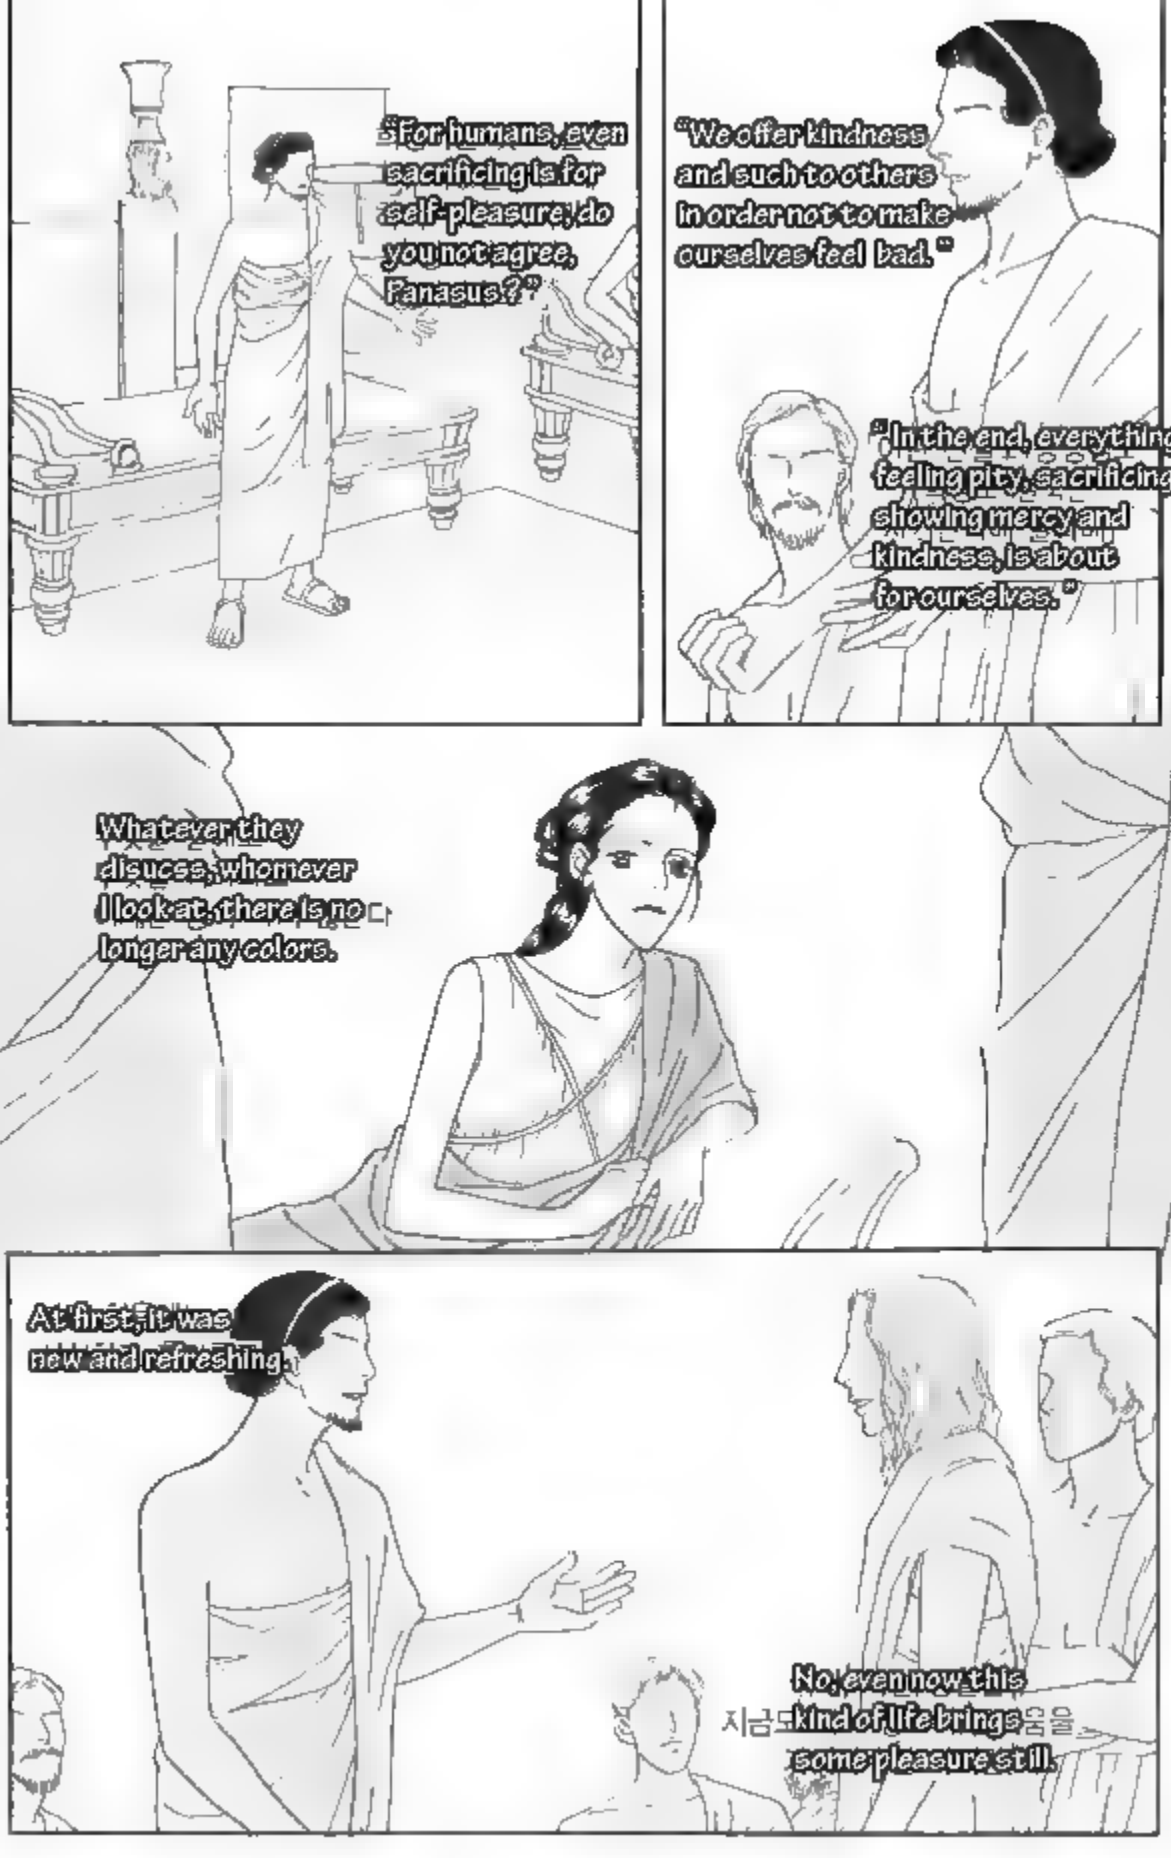
He is인 charming and all...

But

Gray...
I strongly feel that many things will turn gray once I hold that hand.



Many things will change...
No, it is already happening. Athens is already turning gray.



"For humans, even sacrificing is for self-pleasure, do you not agree, Panasus?"
"We offer kindness and such to others in order not to make ourselves feel bad."
"In the end, everything, feeling pity, sacrificing, showing mercy and kindness, is about for ourselves."
Whatever they discuss, whomever I look at, there is no longer any colors.
At first, it was new and refreshing.
No, even now, this kind of life brings some pleasure still.

Are there ... anything that'd make feel excited ...을 것 같은데
I am already free.
But why am I feeling this...? ?
Captain.
The roster of new crew
CSO
Ah, yeah
May I have a look at where they are assigned?
Uh ? Sure.
You didn't receive the data ?
You sent it to me ?

No, I sent the data to those in charge of divisions ...
I am supposed to send it to everyone ?
I thought HQ was going to do that
Well then .
Let me send you the data now
Sure.
Anyway, anything you want to look?
None goes to the bridge, you know.
CSC
Well ...
Yes.
Actually
Someone I ... know is on there.
Aha, someone you know.
A friend. from uni. .
Life science ?
No, it was from space physics.

Sending you now
Thanks, I've got it
Technician ..
Not much chances to run into.
Somebody you want to meet ?
Or the opposite ?
CSC
Opposite ..
We .. had went out for a bit
A little uneasy to see her again
Heh ..

What does that suppose to mean ?
Nothing
You are probably wondering what kind of woman dated this unyielding not so funny guy.
← Started to think so after Jion pointed out.
So, that's how you think about yourself ?
Please, don't make me repeat that
I know, but still I do not want to think so.
It took you 1 minute 24 seconds for that reply.
Nope, I did not

Seeing you act like that ...
I guess that's what she told you, huh ...
Captain, Earth is really beautiful !
He's really easy to read.
I do not think Jion is unyielding and not funny.
It's okay.
I know myself and I do know I am like so.
I also know your yielding and funny side
CSC

What did you mean when you said "Heh"
Nothing really.
I just thought that everyone gets to love.
Jaimes
Please stop playing around.
While we are on the topic, have you ever had a relationship ?
Wow
So, the name's Melrose.
I can't wait to see her
Melrose was the most popular girl in my class at that time.
Pretty, outgoing, nice grades.

I have.
It's a very good feeling to experience.
Eh ..
CSC
Now that sounds like something.
No, I didn't mean anything.
It was just .. unexpected. That's all. I guess you are just like the rest of us, I felt.
It'd be weird if you haven't
It's just that .. I simply cannot imagine seeing you in love.
Does this mean she is free now?

So, you've had those moments when your heart beats faster for no reason.
I am actually glad to hear that.
What's your relationship with Arthur Maxwell ?
Oh, my, what do you think I am ?
I can be moved by beauty.
And my heat can beat faster in front of one I love.
Yes ? Really ?
Hmm...
So, you sleep and snore less
And don't yawn scratch your head in front of one you love ?
Somehow ..., that just pisses me off
Is that it, ma'am ?

Hmm, well ..
I used to.
"What about now?" I wanted to ask, but I did not

Because I saw an invisible door that has been shut firmly

It wasn't her usual open minded aura.

Ryoei Hotel
This place looks like a giant shopping mall
We have a seminar to attend at 14
We should drop our luggage at the hotel and go
So, to the hotel first ?
Its location is coming up on the navigation computer

Should we call a cab? It's not far though.
Can we walk ?
15 minutes by foot.
That's what it says.
That is close Let's walk.
Sure.
Pretty much all shops here are
for shopping. Not much different from Earth
Even the Lunarland was clearly an amusement park.
I only saw it from images though.

You lead.
CSC
CSC
They need to be unique. They don't have to look like Earth's.
Grass and bushes... Exactly the same
Well, if you stay here in this dome only, probably so.
But this Earth like place gives Moon workers comfort they require.
CSC
As long as you are here, you know you are on Moon.
Gravity.
CSC
Ah!
CSC
Now you mention it -
I think I've gotten used to low gravity because I've been going there often.

Your room is located on 5th floor, business class.
Business class ?
This hotel is owned by Redraccoon.
Hmm ...
esc
Enjoy.
Let's get ready.
We have to get there by 14.
Don't forget the card.

The pilots will stay for 4 days and ..
They will examine the system while at it
How long can the pilots stay in space ?
4 months and more in low gravity.
But they will go through various gravity tests.
Are they going to stay in space longer than before ? Or are they simply going to unload cargo and leave ?
Excuse me.

Ah.
Their task has not changed.
Hmm
There is nothing for us here. Why did they even call us ?
Sigh ~
I am sleepy
Go bed early tonight, we have another seminar at 10.
It will end before 13, so we come back here and get changed for the wedding at 14
Yes.

You must be tired. Go to bed early
Yes.
Can I take a shower first ?
탁
쏴아-
Are we going to be here together for rest of the day ?!

Still nothing is going to change.
I cannot deny I am feeling nervous though.
In Diotima, even when we were together, I never felt that we were really together alone.
Ever since I was called "Captain mania", I've been feeling eyes are watching me.
Well, for two full days, I am going to be with the captain all the time together ... alone.
Phew

Ah, beer
Would you like some ?
No, I do not drink.
Eh ?
Not at all ?
Not even wine ?
I do drink a little when it comes with a menu.
But basically I do not like to be drunk.
I see
You are no fun.
Hm...
It's good to be drunk occasionally.
As long as you don't drink too much.

I dislike it though.
Aren't you drinking too fast ?
Eh ? I don't think so.
Good with alcohol ?
No, just average.
Well
We don't get a chance to have beer at all in Diotima.
But control yourself. We need to get up early.
Yes.
Are you going bed now ?

Not yet
I need to do
few things.
I think ..
It was good
that I agreed
to come here
with you.
Hm ?
I feel like
we are on
a trip
Haha, we
are at work.
Still

I was glad that you asked me to come with you
You are a weak drinker
No, I am not -
Mm.
Maybe
Anyway, I
No, wait Oh, I -
Well -
I would like to be closer to you, captain.

Aren't we already close enough ?
No, I mean ..
Personally ..
Not as a captain and vice captain, but as a man and a woman.
Hmm..
Captain, you show - no interest in people.
No, it's more like

I am sorry.
I am going too far
People have different views.
Everyone can not have the same interest
True.
So, you have no interest in me.
Yes, I get it
He's so drunk
I am not drunk
What
Did you read my mind ?
It's just that ... This is Moon and ...

And we are here together alone
Maybe, that's why.
I have lots of questions for you.
Yeah ?

So ?
What do you want to know ?
Too many ... I don't know where to start
That much?
I feel that, if I can get to know more...
I think I might be able to get closer to you ...
Jaki-mes
You always draw a line and do not cross it.
I don't think you will cross.
Haven't you had enough ?

The crew like you very much.
I am glad.
I like you, too.
Haha
Pro-pose?
종열
You are beautiful and you are good at what you do ..
종열
Heh, it is weird to hear that from some one who scolds me always
Um.

So, I grew some expectations.
It was pure luck that I became the vice captain who gets to stay the closest to you.
Hm?
What ?
I can't hear you
It's been too long since I had alcohol
Yes ! You've had enough.
No, it's not

But I am serious.
Eh
How can I get closer to you ?

What's your home town ?
Saint John
Ah
I am from Fisbrugs
That's close.
Close ?
Yes, it is in this age.
Captain.
Mm ?
Anything
Please say anything.

I am sorry.
I feel like I showed you my embarrassing side.
No, don't be ..
No.
I am really embarrassed.
And I feel like a kid trying to get what he wants.

You've done nothing wrong.
Jion.
Let me tell you a story.
Yes, anything.
Please.
A long time ago,
There was a woman.

She loved a man with only one arm and a crippled leg.
The woman's family is some what wealthy.
But the man had no parents and was poor
But that did not matter to her much.
Because she truly loved him.
And the man loved her back, so they were happy.
Were they married ?
Yes
They lived together, so I guess you could say that.

Hmm.
Then, one day
While she was
Returning home from a nearby village, she died by an accident.
Yes.

So, the story ended there.

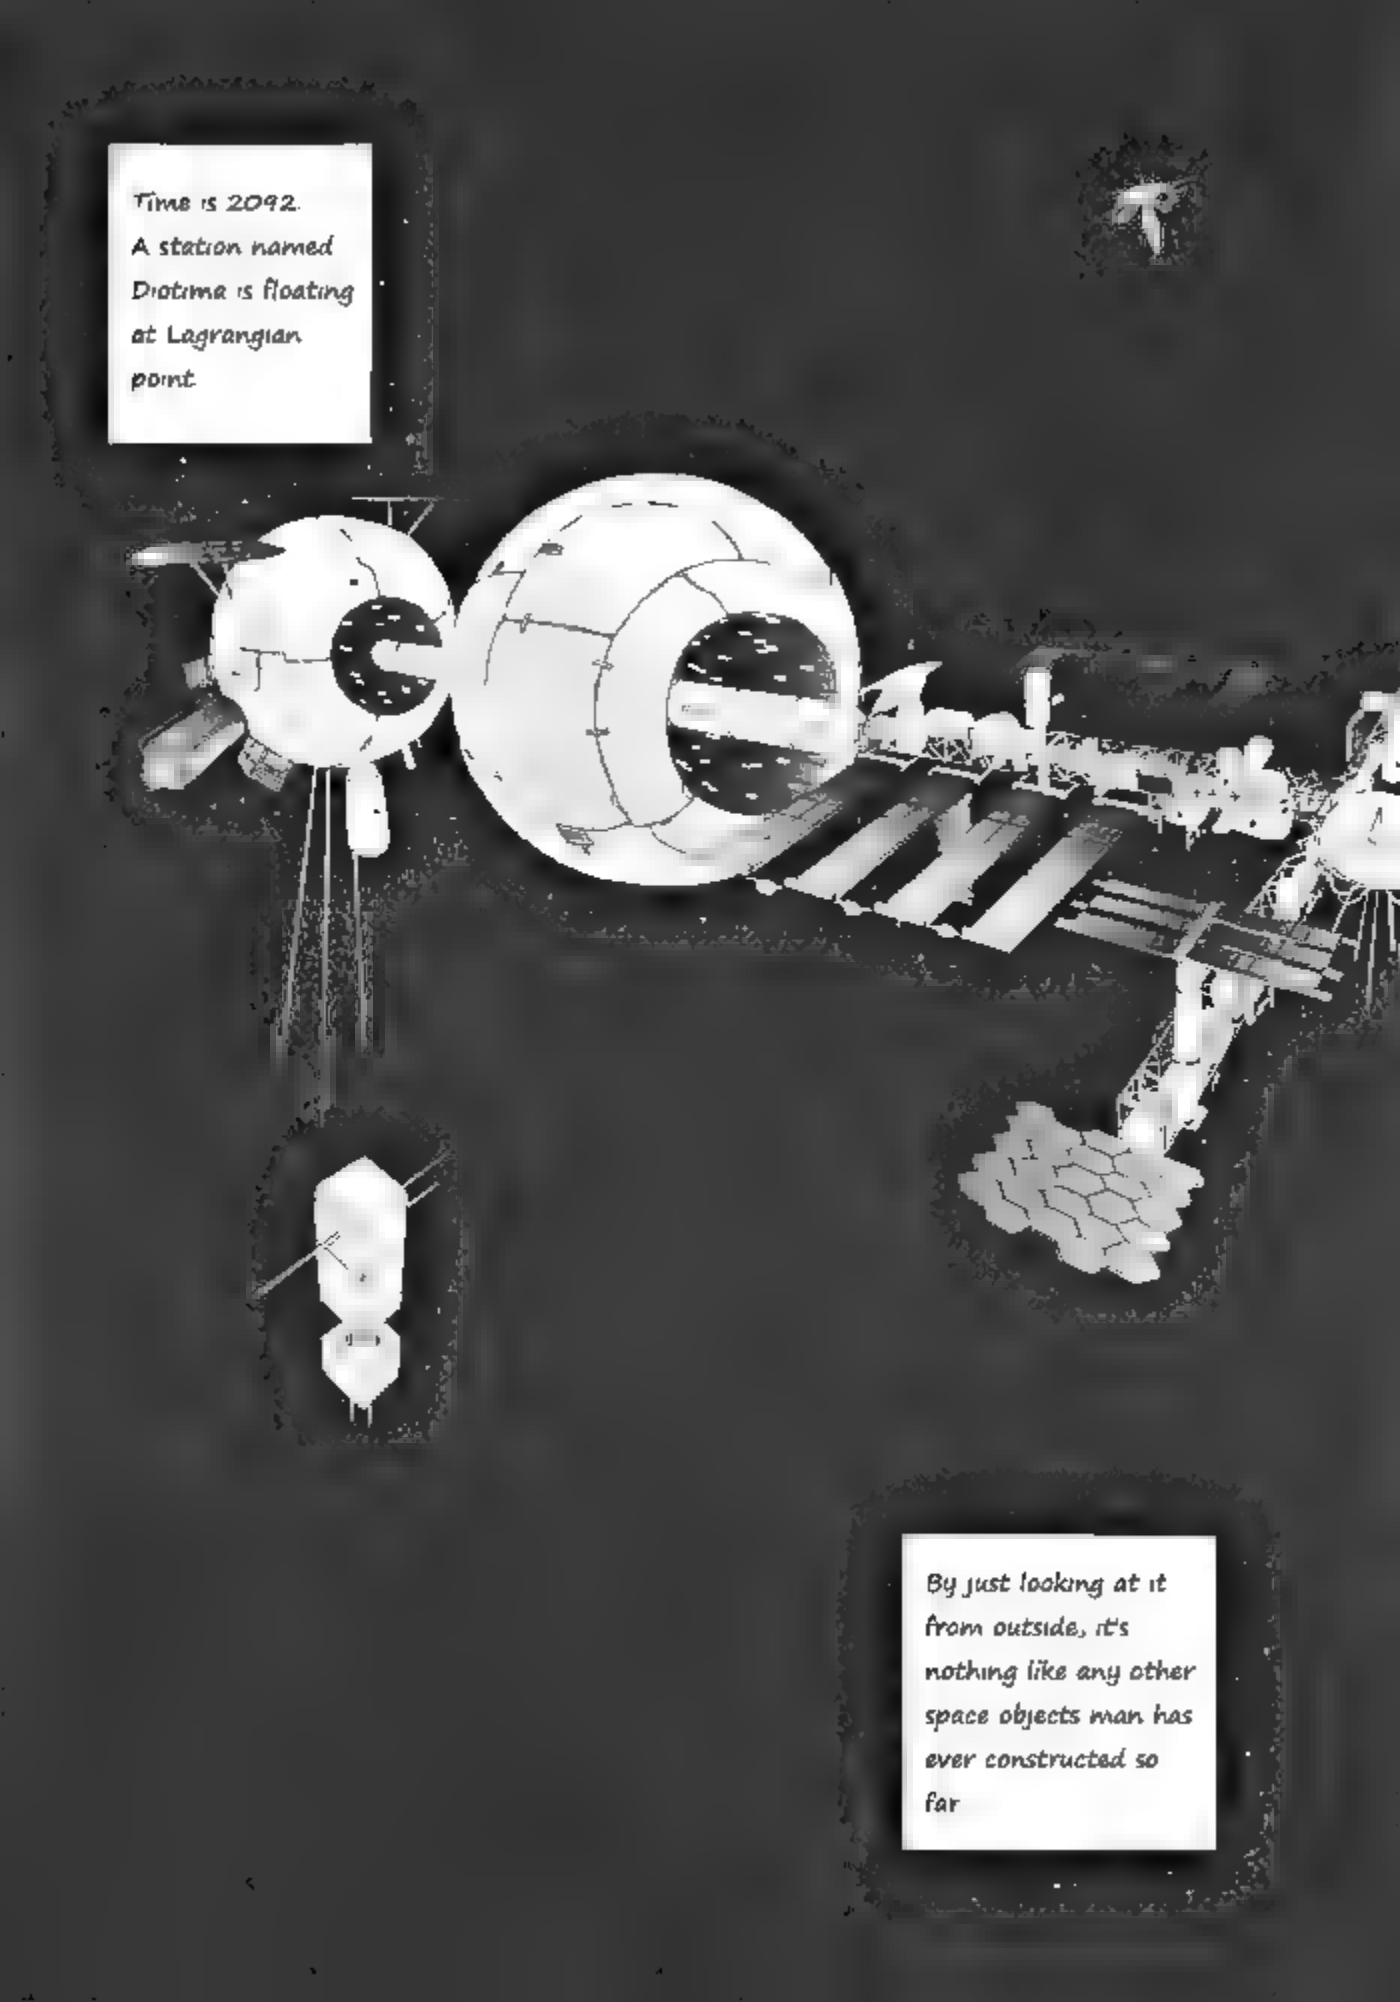
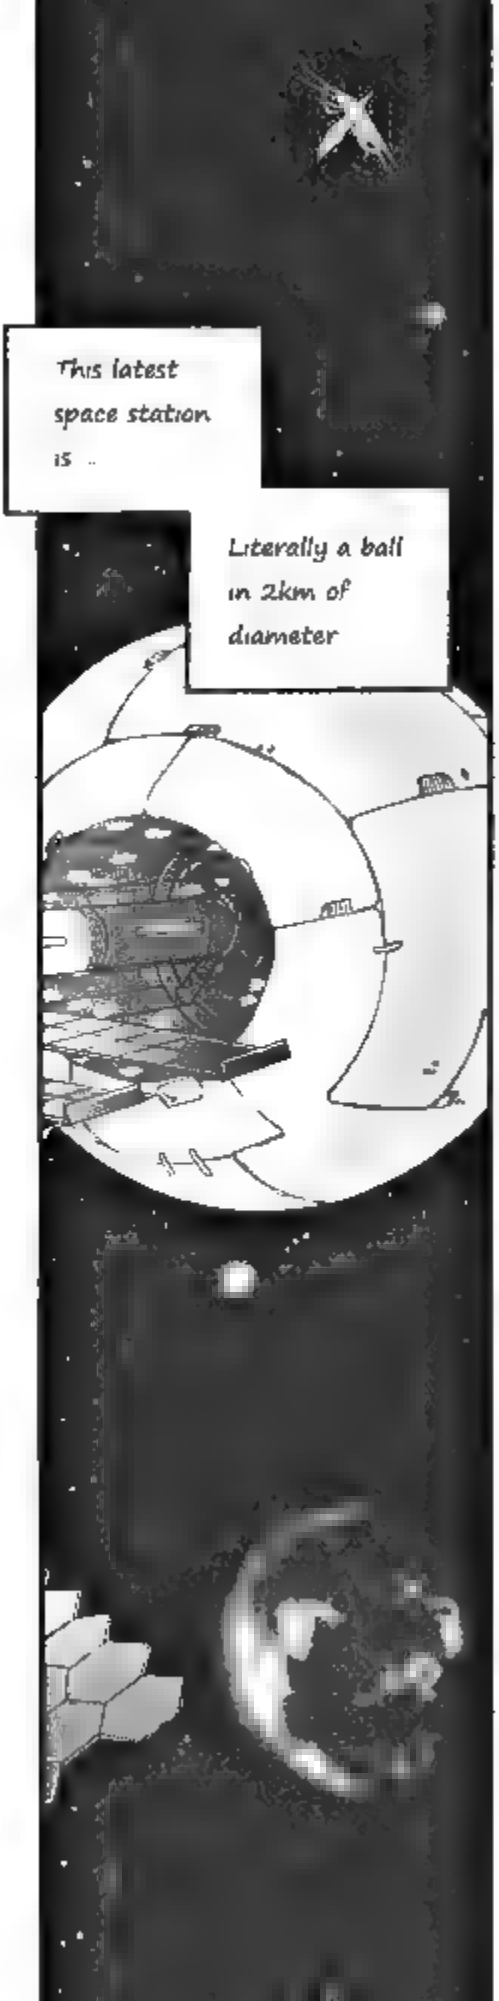
THE RANDOM VESSEL DIOTIMA



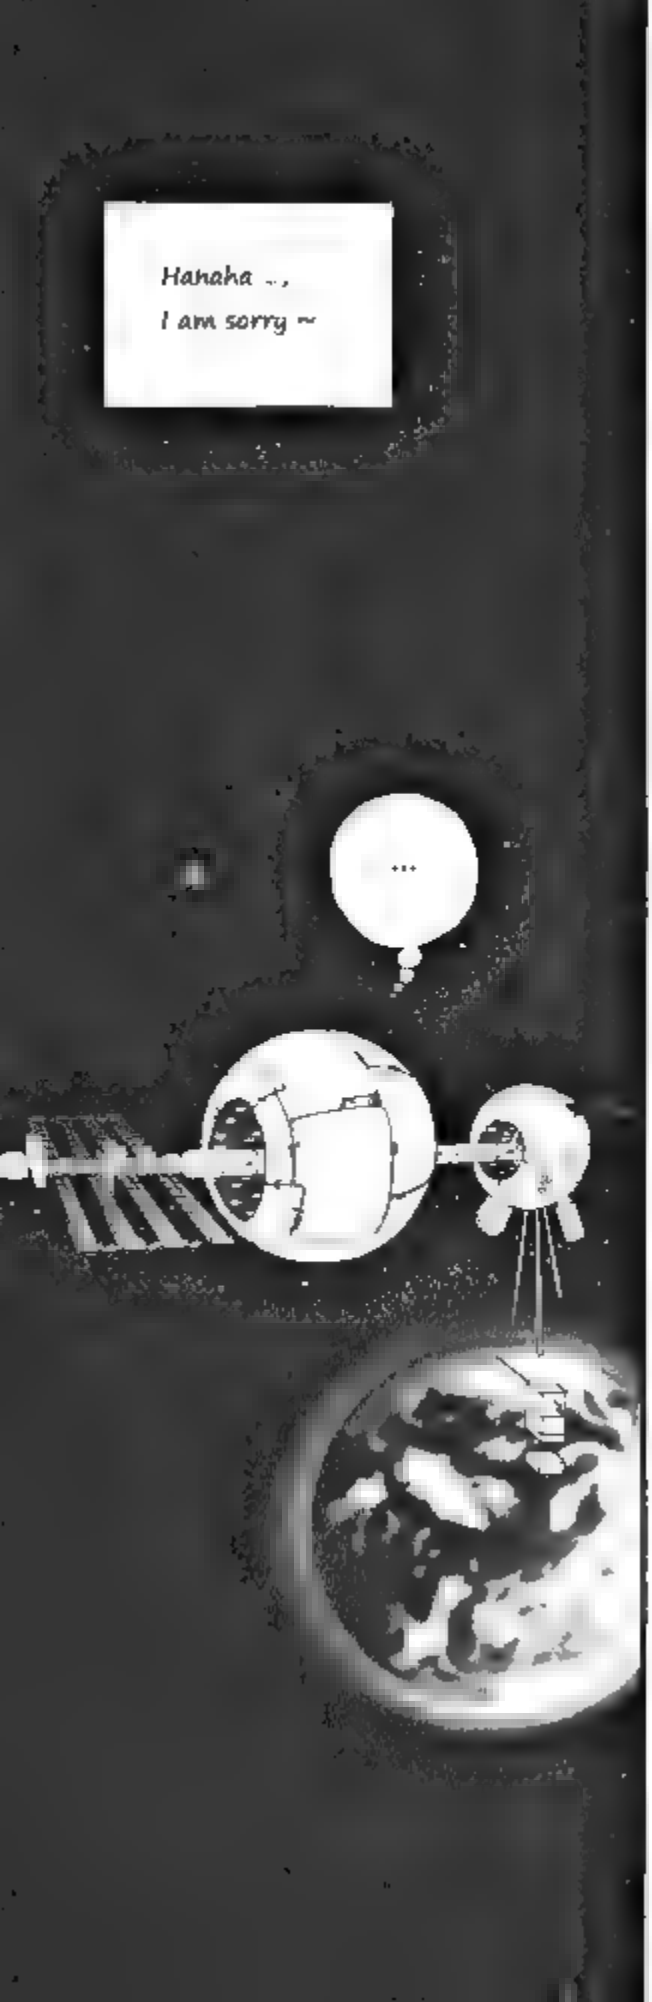
Time is 2092.
A station named Diotima is floating at Lagrangian point
By just looking at it from outside, it's nothing like any other space objects man has ever constructed so far

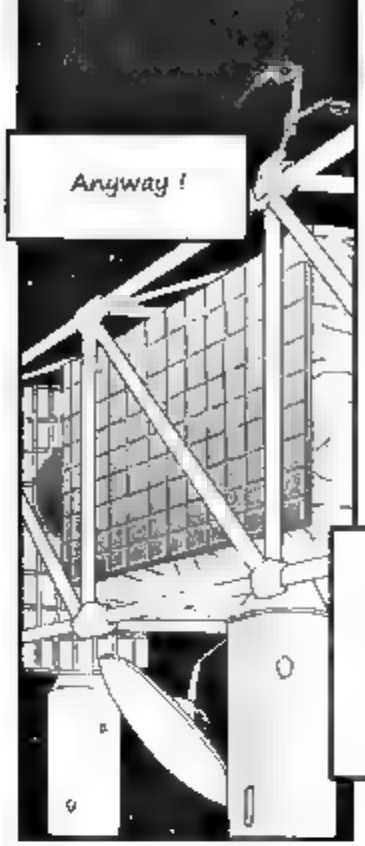
Its apperance is elegant and noble.
Surface is made from 24k pure gold.
Windows are made of artificial diamond from Mars!
There are also two giant turrents, one on front and the other on back. The turrents were high powered mega particle lasers.
It can attack and defend itself
Furthermore, in its core, there was a gravity generator
So, the crew are able to live in it perfectly fine.
No words could describe how I felt when I saw bare space through ceiling of bridge !

What I've said so far is all lie.

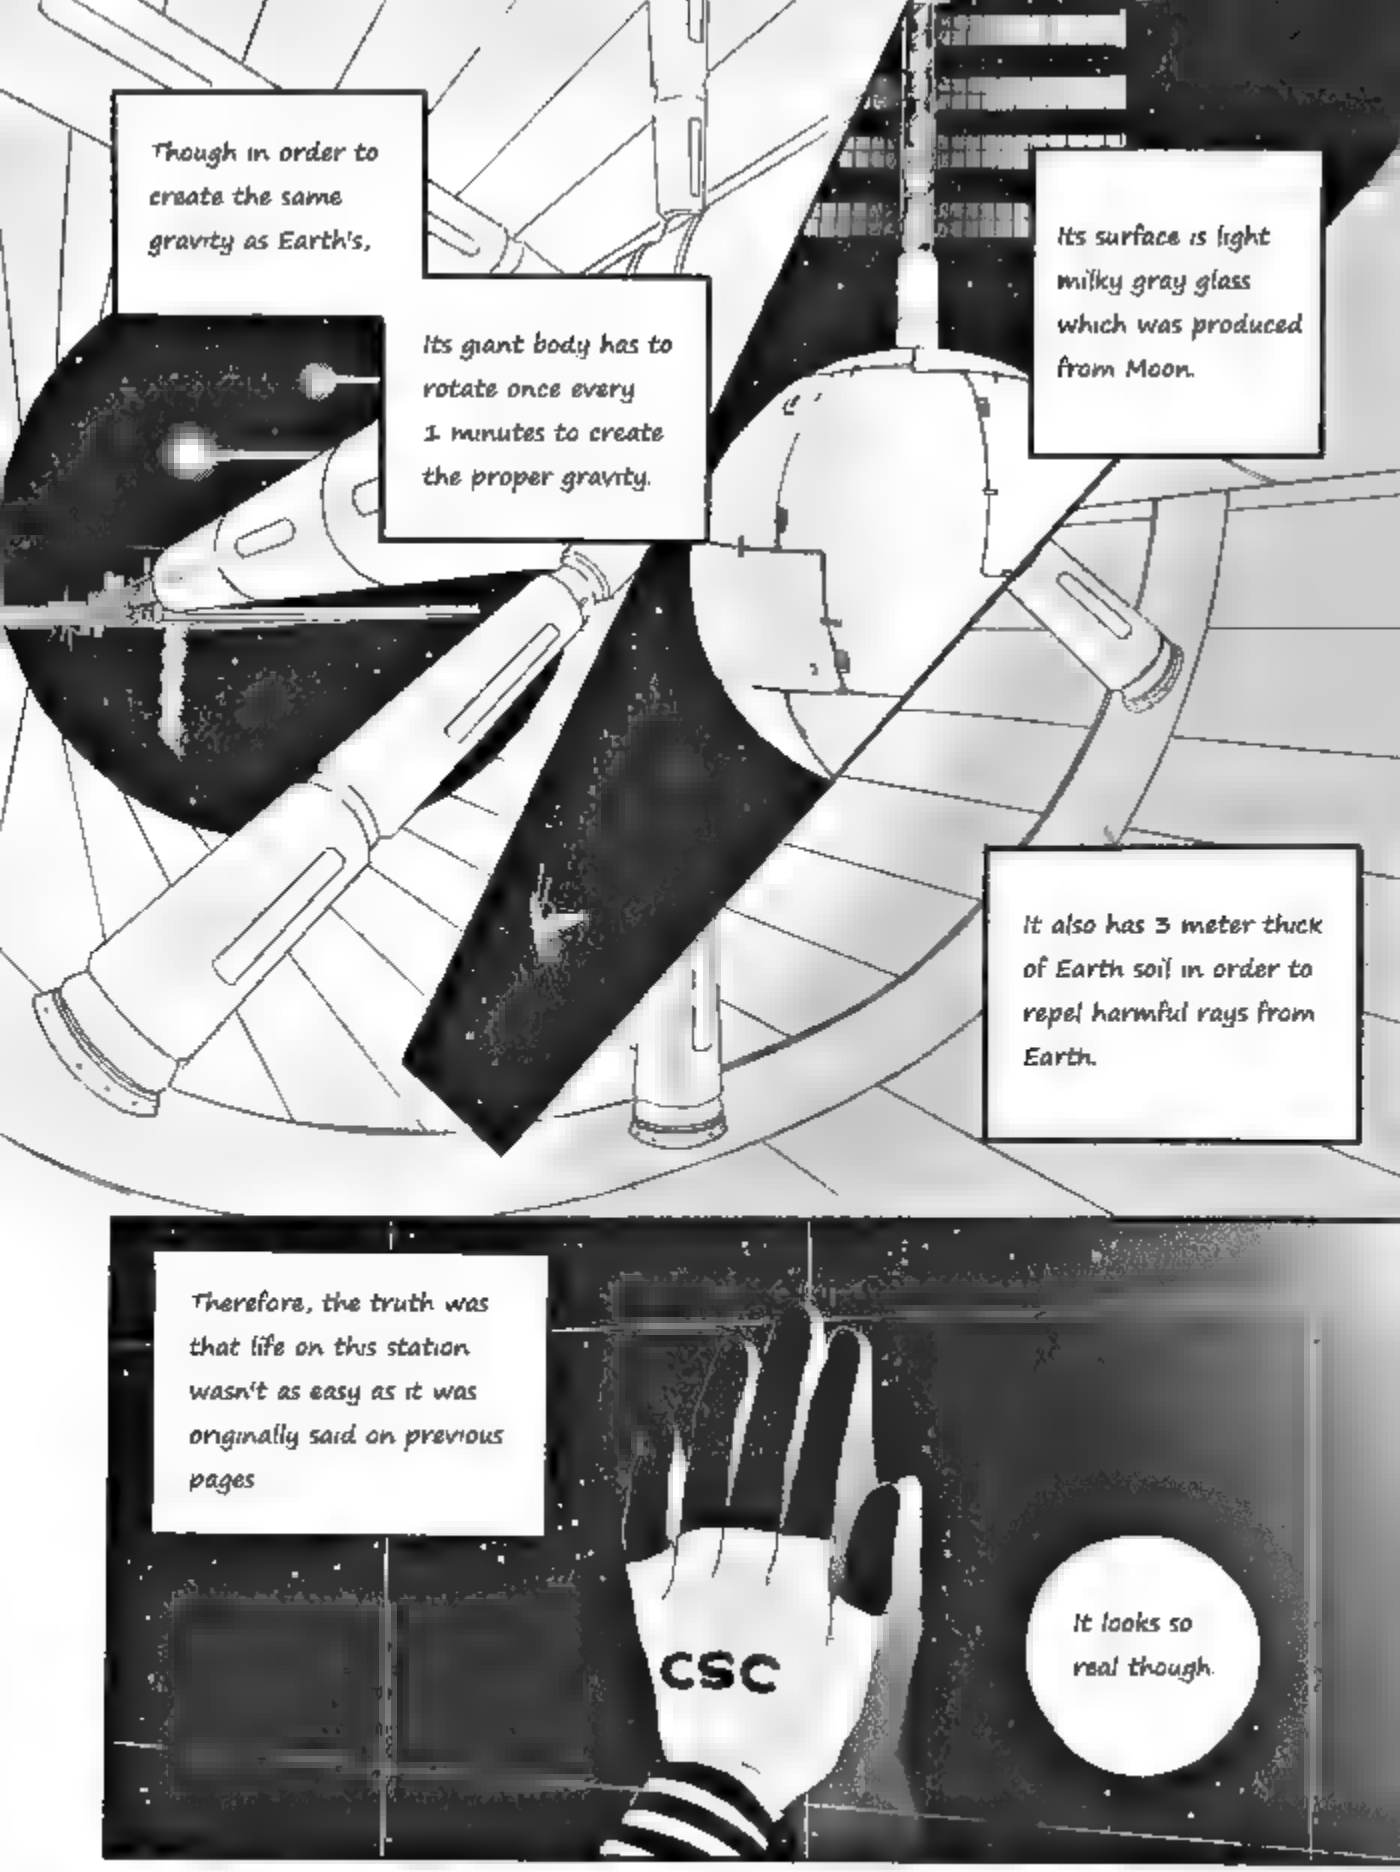


If there were readers who believed what they read, which was ridiculous to start with .





This latest station which has a rather classical name, Diotima



Though in order to create the same gravity as Earth's,
Its giant body has to rotate once every 1 minutes to create the proper gravity.
Its surface is light milky gray glass which was produced from Moon.
It also has 3 meter thick of Earth soil in order to repel harmful rays from Earth.
Therefore, the truth was that life on this station wasn't as easy as it was originally said on previous pages
CSC
It looks so real though.

I bet this is fake as well.
Haha.
3D graphics these days look so real that we can't tell really.
But the Moon in the cafeteria rotates once every 2 minutes
I could even see a satellite from Mars.
No, Saturn.
Right !
It looks so real, yet so fake.
But the graphics here are too real
They serve different purposes.
Purposes?
Images on Diotima are mostly to let you know that you are in space.
The Moon rotates once every 2 min.
That's called "break" ?
Break ?
Yes.

If it look so real, even when it is
fake, people will think that it's real.
I guess so.
So, they made it obvious that it was fake.
With "breaks", it looks real but yet fake.
You can even see a patrol craft hovering over the station repeatedly.
I've never seen that
Yeah, some never notice.
Some tourist never realize that it's fake.
Seriously?
Even though it is logically not possible to see bare space throygh a solid wall.
But those who walk in real space don't get fooled
Whether there is the break or not
They know the real space.
How ?
I don't know. I want to find out why.

When we came here,
We all saw the real space once.
I was truly moved at that moment.
But ever since I came here, I've never got to real real space.
Once I get the license,
I will enter the low gravity area and watch the real space as long as I want
Don't tell me ..
That is the only reason ?
To see the real space ?
"Only" ?!
It's space, universe !
Real space !
Eh ..

Um, your expression bothers me.
You are trainees, right ?
Go to M·B.
Mira, why do you want to do this then ?
Because I was bored with 1G.
But most of places are in 1G. Even if you earn a license to enter low gravity .
Low gravity area is restricted to civilians.
The only privilege I can think of is .. watching bare space from the main elevator
Because you need the license to enter
Food in low gravity area isn't good, either
And not good for our health also.
Gravity trainees please come to M·B before 15 o'clock.

Still

Where I can go will be expanded by the license.

There is a big difference between not wanting to go and unable to go.

Yes, that's true.

It was a lie. I lied to her

The truth was that I liked this station's tight structure.

And I never felt that it was too small for me.

The only reason I want to go there is him.

Ah, Late, you tied your hair into a pony tail

지이

It was because I had lunch together with + the captain.

I told her that I wanted to get a chair cut since my hair was too long, but she did this to me.

지긱

Does it look weird ?

No.

He -

It looks pretty good on you.

Is a moon child.

"Moon child" basically means those who are born on Moon.

There are very few moon children.

Ever since it was revealed that Moon children cannot survive on Earth, women refused to give birth to children on Moon.

It is said that they can not survive on Earth because they are grown in low gravity of Moon.

In fact, few moon children went to Earth and died in few days.

They all died of heart attack due to gravty.

"He is a moon child, so he cannot come here."

"So, I want you to be his friend."

When the captain told me so,

I was a little interested.

Because ... moon children seemed mysterious

Being born in different gravity does not sound much, but it is a huge deal

Though I don't think I can be close to him.

P.

Bio signature verified... Logging in...

Well, let's give him a little attention.

I am .. Laterasa

I am from Moon .. .. Nice to meet you

지지지

He looks normal

But different

Very different

Mira ~
Are you listening
to me ?

It is a party. Could you at least smile ?

Hey, Mark ! Don't sit there !

Why didn't you invite Laterasa ?

What for ? He's a moon child.

?? They can't come?

Idiot... , it's not like they don't want to come..., they can't come due to gravity.

. Yeah ? What a waste ...

Where does he live then ?

In a hotel in low gravity zone.

I talked to him for a bit not long ago.

He must be bored.

Bored ? I want to be him. Independence !

That's not what I am talking about ..

He can't come here. That means he has to talk though computers only.

Well, I don't think he cares

In fact, he sounded like he didn't want to talk

Yeah, we didn't have anything to talk about, either

Have you tried to talk to him also ?

Of course.

He sounded almost as if he didn't want to bother talking.

I felt like I was forcing him to talk, so I dropped my call

When I told him that he must be sad not being able to join the party,

He made this weird face and said, "I guess so."

What was weird ?

His expression.

Alright,
I am ready

끄응

But -

What...
to say ?

Ey ?

Well... I guess
I will manage.

Ah, he answered !

Ah. ,
Laterasa ?
Hello ?

I am Mira.

Mira ?

You don't
remember me,
I bet

Can you
turn on your
screen ?

Uh, sure.

I am turnung
on mine.

Did it work ?

Oh, yes, Mira..
We had the class together

So...,
what is it ?

He sounds ...
so weak.

We have a birthday party today.

They talked about you.

Huh ?
Did I say something wrong ?

He made a weird face just now

Um,
and ..

Yes.

And what's the matter with his answer ? Timing is not right

This is a little ...

Jaejunes

The captain told me to be your friend

Yes !
That is the only darn reason I am calling you !

She did ?

Eh

Yes ..

Now his voice seems much stronger

I met her in the main hall earlier today, and she told me so ..

So, that is why you called me.

Um ..
yes .

Yes..., that's true.

Yes..., but

.....

I am sorry,
but I don't think
I need friends.

Hmm .

No, I don't think
I need friends.

Eh .

Huh ?!

This jerk ...

씰룩

Hot -

My abdomen feels hot !

I cannot stand up !

And I can feel something in my hand...

My internal organs ?

I don't think I can survive from this wound -

So ..

하아

하아

케엑!

What a mess

하아

Is this where I am going to die ?

하아

I feel dizzy
too dizzy ...

The ground
is shaking

My heart is
beating so
loud ...

Ahah - ,
this is not
working -

If I let go of my
hand on abdomen,
will my internal
organs be pouring
out - ?

I don't care
anymore -
I can't

"Be careful."

Ah

Aristarchos ...

He ... He needs me ...

Without an arm
and with a disabled leg,
he won't be able to
do much on his own.

blor

blor

If I don't return to him ...

He ...

Through widely open iris of mine..

A white Moon was projected into my eyes ...

Hmm

No, I don't think I need friends.

Thanks for paying your attention to me though.

...

Hmm..

Yes, that's it

Hah -

Yeah .. ?
I see. Bye.

딸깍

What the hell ... ??

헉/ 이/

I feel like a fool for even thinking that he might be feeling lonely.

So, he doesn't need friends.

Fine.
Fine.

괜히 저런 대사는 내쪽에 더 어울리는 거 아닌가

뱌!

Are you sure that you'd like to cancel the gravity class ?

NO

YES !

Your gravity training course has been removed.

Hmph!

Yes, I think HQ is already aware.

I was contacted by COSMO police due to the terrorist attack.

Still ... ! God, that pisses me off still.

Tell Jion to come to the low gravity conference room.

I will be there after I pay a visit to ..

It's about temperature. Some are complaining.

Alright, thanks.

Hey ~ Mira !

...

You've seen Laterasa, right ?

What do you think? Can you be his friend ?

He doesn't need friends.

What ?

He says he doesn't need friends.

That's what he said when I called him.

Really ?

Why doesn't he need friends?

Even if you ask me .

Aren't you curious ?

Why doesn't he need friends .. Maybe, he doesn't really need.

그럼에 말하시면

Well, I don't know

Anyway, I was clearly told that I was not needed.

So, are you angry ?

Anyone would be angry if they are told like that directly.

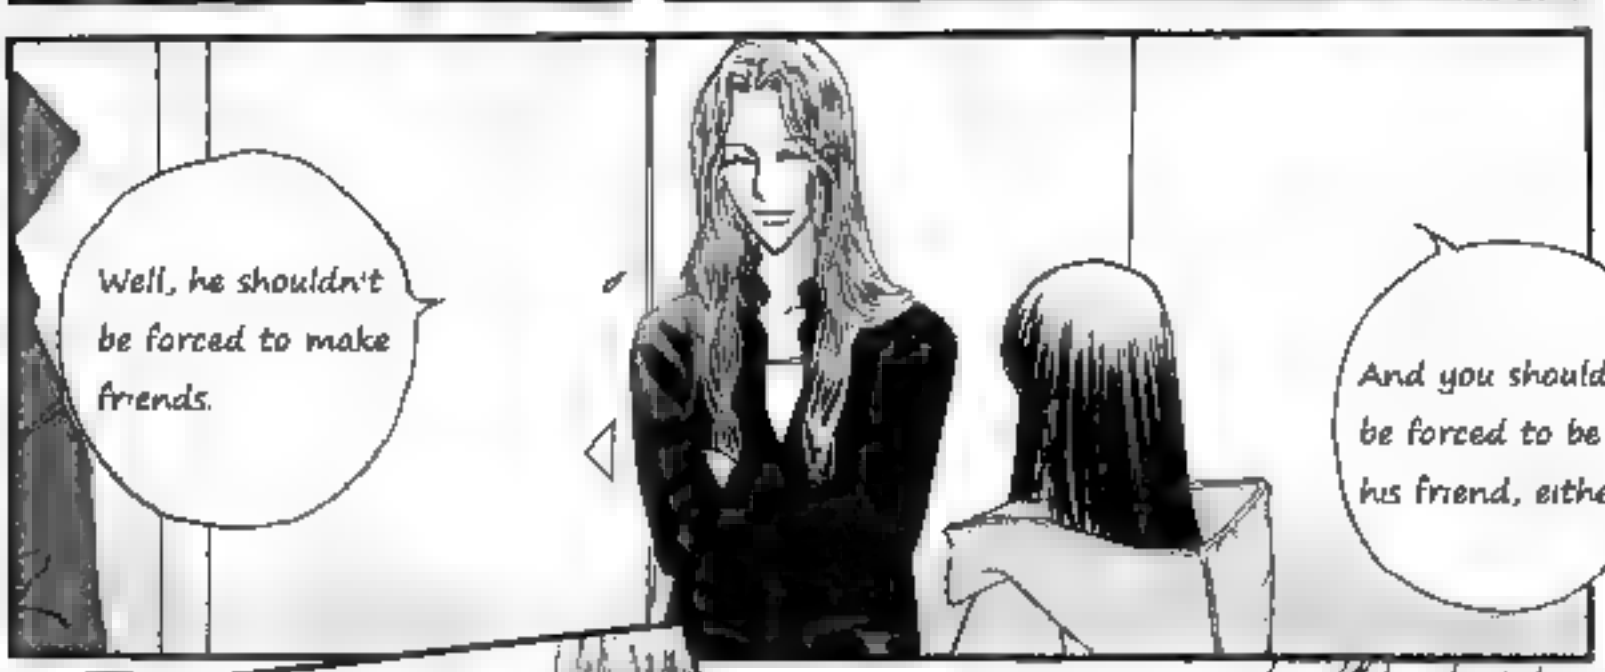
Well -

Anyway, that was enough for me.

I won't call him again !

When he said that
Do you think that was what he intended ?
How did he sound ?

I don't know.
He was weird.



Well, he shouldn't be forced to make friends.
And you shouldn't be forced to be his friend, either

But
If you think about it
It is likely that he has never had friends of his own age before

So, Mira

Did you really intend to be his friend ?

Let me rephrase Did you have any interest in him ?

Yes

Ugh, don't ask girls such a question directly.

You see

When he said that ..

I think he meant something different.

Though it is likely to sound that as a strong refusal ..

It's not "likely" ! It was !

He refused. What more is there ?

As far as I know .

He was the last moonchild.

There are a total of 8 moonchildren

Three have already passed away

You see, Mira

If I want to talk to you, I simply initiate a conversation with you.

If you respond or show any reactions, I can work from there.

Though if you ignore me, it won't work.

Sit

I will stand ...

If I stop trying at that point,

That will be an end to our relationship.

However, I can still try to talk to you later

And, of course, you can still try to ignore me.

But you may answer at some point

Even if you keep ignoring me,

I can keep trying to talk to you.

... Citizens of Paris had held Paris for 62 days. ...

That was "Paris Commune"

Laterasa, have you heard of this ?

Ah, yes

I've read about it from a library.

Kinda weird to see a moon-child learning it ...

Well, it's a history class ... Learning common knowledge, I guess.

오늘은 똑같은 것을 반복하고 있다는 걸 학습하긴 싫군

It is unlikely that he will ever visit Earth alive ..

What's the point of learning Earth's history ?

Ahan

Yes..

He will die ..

If he comes to this side

But he looks healthy.

Will he really die if he comes here ?

And he cannot go to Earth.

Is Moon where you were born beautiful enough for you ?

Why do you not need friends ?

Ahah

It seems I am not angry.

Hmm, I want to try talking to him.

Yes, I am sure.

Perhaps ..., I need a plan.

But what if I get rejected exactly like the last time ?

달칵

Oh, captain.

So..., how are the results ?

I have them right here.

Where is Jion ?

He will come soon. He's looking for a light bulb.

A light bulb?

A blub has gone out on the bridge.

Ah, I see.

Please take a look at this.

끼익

Their overall health is alright.

Myu, I am here.

Come over here.

What is it ?

Those who work in low or ultra-low gravity area are not doing well but it's not extreme.

Engineers are fine since they are constantly moving. They get their workout while they work.

The problem is those who work in chairs ..

In other words ...

빠직

You

You and everyone else on the bridge !

You guys are the biggest issue !

탁 탁

Jaxigmes

I've been saying the same thing for a long time.

Why is that for past 7 months ..

their fat has been increasing at a steady rate ?

Except you two and Van Doran, the others are getting more and more fatter since they don't work out at all !

Now you menion it, Van Doran lost too much weight

Yes, he has lost 8kg since he came here.

Captain, what are you doing ?

Dandruff

Please ..., the gym is not there to just show off

Please don't do that in public

Sorry

This woman ..!

Woah!
You have A LOT!

Have you gotten a medical attantion?

Um .., it's a rather .. private issue ..

Myu ..

Please do something about our captain ..

Space dandruff

"Space dandruff" ?!
It's just dandruff!

Space dandruff sounds more romantic

Dandruff is just dandruff !!!

Since you are here, let me take a look at that

Hm

Anyway, they don't listen to me.

I am going to have to leave this task up to you two.

By the way, Mr Cox has lost way too much calcium

Ah

Cox earned class 1 low gravity license recently.

Yes, he has been literally living in low gravity.

He even eats there.

그런데 콕스씨는 거기서 뭐하는 걸까요?

그냥 지구로 아니아가 된 거 아냐?

Then why is that license missing from his record ?

.. Is it missing from all of his data ?

Ah, captain.

Can a teen earn the license ?

It will be useless but yes, they can.

It can't be used for resume

I see

Why ?

Well, Lt Lindgren's daughter has requested for full checkup.

You mean Mira ?

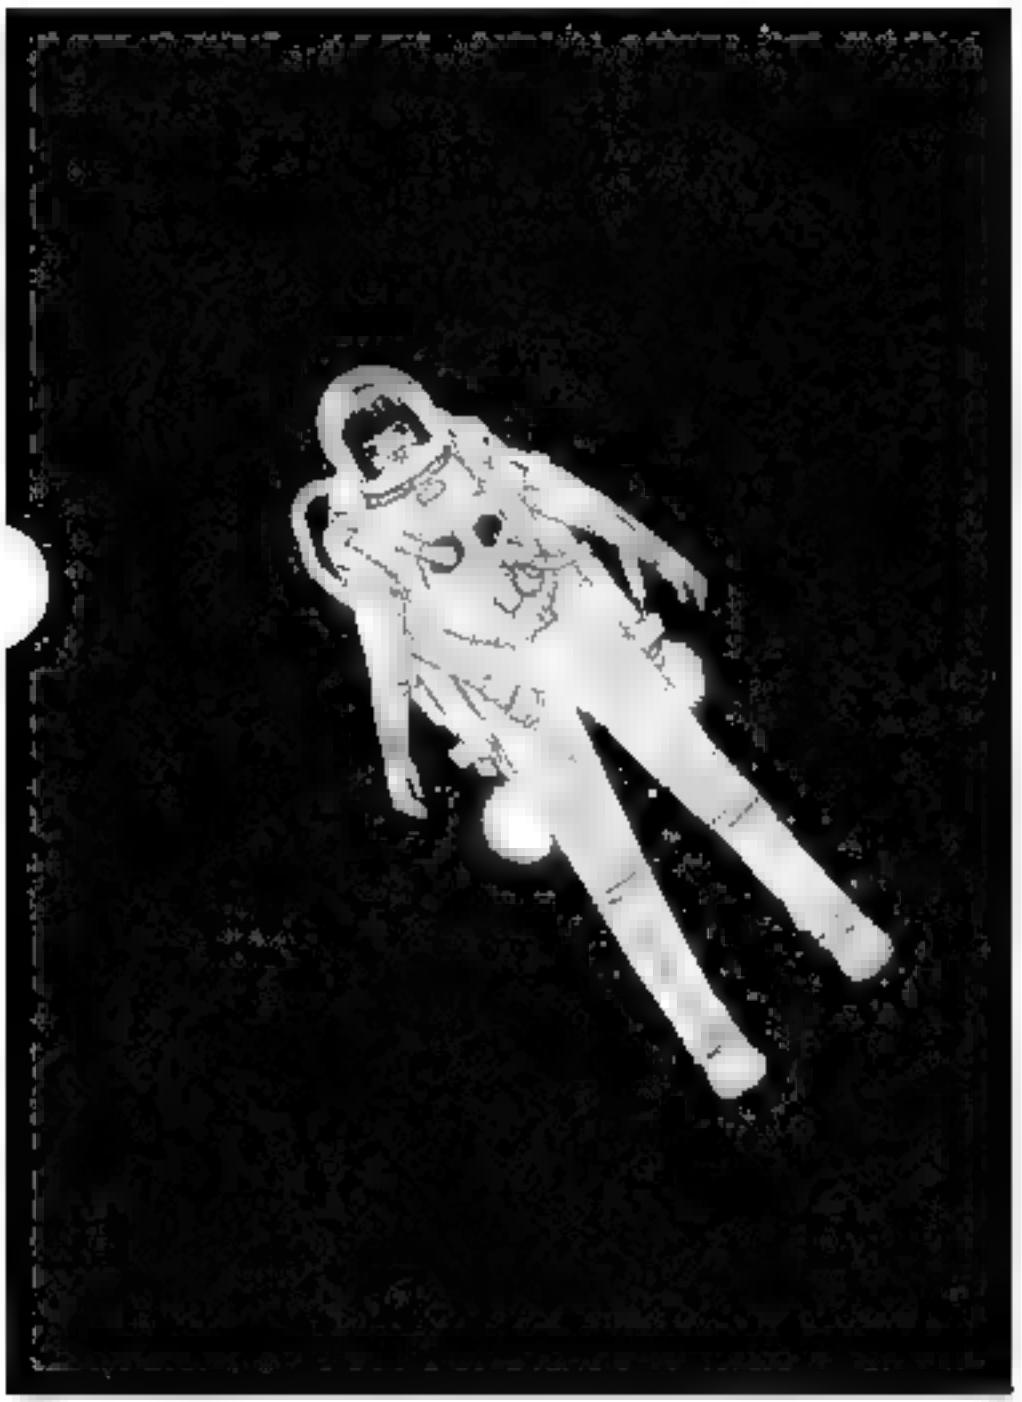
Class 1.

Class 1 ?! That's not easy.

And it's not good for growth.

Well, I don't see a big problem personally

Is that so



It's Earth !

So cool !

CG is nothing compared to the real thing !

It was hard to believe, but now that I see it ..

Can you feel this ?

Real Earth
Real space ..

They look pretty much the same as CG, but it's ... just different

Yes.

This is the real thing.

This is how real space feels like ...

Such ... sensations

Ah, um

Mira, right ?

Yes.

He remembers.

Are you alone ?

Yes.

Do you live alone ?

Yes.

..

If I stop right here, that's it

About what you said

Hmm ?

What ?

You said you didn't need frends.

Ah, yes -

Did you mean you didn't need frends

Or -

You don t want me to be your frend ?

Ah

I meant that I didn't need frends.

Friends - as in everyone ?

Yes.

F, fine, let's not use "friends" then

?

...

Do you not want to talk to others once in a while then ?

...

?

I didn't mean that

Very well.

Why don't we talk to each other once in a while then ?

Eh -

S, sure

A wise choice.

My plan worked ~

나랑 어울리는 대효라는 아니었지만

Now the first step is made.

You , do your parents work here ?

Yes, mom is a COSMO police.

COSMO police ?

Who is it ?

Lindgren.

Erma Lindgren is my mother

Erma ..

...!! Ah, the woman with shining sparks !

Shining what ?

That was a dramatic expression.

She is your mother ?

I think he just showed real interest for the first time.

You don't look alike her .

I am adopted. I have some Asian blood.

Yeah ?

You know what "adopted" means, right ?

Even I know that much.

Do you have parents ?

They passed away

I used to live with my grand father

But he passed away a while ago.

So, you are alone.

Yes.

But you will be alright

If you can meet the right people.

Yes.

When I saw
him smile,

I wanted to see
his real smile
beyond what I
see on screen.

I am sure it would look different like this universe -

Anyway

You look different from the last time. You didn't seem to care much.

Mm

The real thing is certainly different, huh ?

It will only get better

By end of the course, we will get to be in real space.

In real space ?!

I bet it will look better than what we see from here

Yes..., the only and true place for true space geeks ~

This wall defines true beauty -

True quietness and true isolation.

Anyway, it's a good idea to earn class A license.

Though some say that it's not good for growth

Ask yourself When do you get to see space if at all ?

It is unlikely that we can come back here once we return to Earth.

Truth is that life does not go the way everyone wants ...

Well, so ...

We have to do what we can while we can

It's not like we have much time left

What do you mean ?

Our company policy is max 18 months in space.

But Diotima is an exception since it has 1G and large. It's 39 months max in here.

I wonder how it is for COSMO police ?

They don't stay long.

Your mother could be an exception since she was called by the station

... Well, so, my point is...

That enjoy this while you can. That is exactly what I am going to do

I will watch stars and space until I go home, until I get bored.

Yes..., everyone has to go on their own path one day...

Mom, when do we go back to Earth ?

Huh ? You wanna go back ?

No, it's not that

I heard that there is a time limit

Didn't I tell you ?

No.

Do you want to live here forever ?

I think I will be recalled back to Earth by 2094 fall.

I think it will be New York.

It's far from California.

That's fine ..

JANIMES.COM

It's not just far ..

It's way too far

So, you see

She probably wanted to be as far away as she could from where father and his lover work

How do you feel about it ?

Well .., I guess I miss him a bit

But I feel relieved in a way

Because there is a good chance that there will be another adopted daughter at his home ...

Just thinking about that make me pissed

And, well, um, I lost all my frends when I came here.

It wouldn't be a bad idea to start fresh in New York ...

Why do you not need friends ?

That has been bothering me.

그거 굉장히 이상한 거라 말야

Oh, yes ..

Because I don't need them.

You ~ know ~ what ~

I could be considered as a friend.

I don't think so.

Uh...,
yeah ?

How do you
define friends ?

I received some
serious damage
just now

What do "friends"
mean to you, and
why don't you
need them ?

To me,
friends are

Those who I can reach when I need.

Eh ?

Like this .

Those who I can physically touch them.

Those ...

Who I can go and visit them while we are alive

Hmm... , so he's been thinking about such stuff

Heh, I can enter low gravity area after 3 more classes.

Well, if you say so, I

Not just for limited time.

..

You can make friends through e-mails and video chatting these days.

People don't have to meet in person now

Ah -

Do you know how much it costs to call someone on Moon ?

Even before that

Are your friends all on the same level ?

Friends who live in the same area.

Friends from classes.

Friends of friends are friends as well.

And they are all Earthians.

They share the same ground and the same sky.

Those are granted for you.

That's why you can easily make "friends" by other means.

Because you and the others know that they can reach each other.

Those who you can reach ...

At least you are free to try.

That is why you can easily say "friends"

You also know unconsciously that you can reach them.

But it is not for me.

I don't have those simplest guarantees.

I stand on what seems to be a web.

I stand barely on a fragile web.

There are people on Moon, in fact a lot of them.

But they are engineers, scientists, workers in various fields, and tourists.

And they can stay there for maximum 3 years before having to go back to Earth due to potential health issues.

And, due to the laws passed in 2074, people under 18 cannot stay on Moon.

There are few who were born there

They are all adults.

Age gap is pretty big

Besides, they ...

.... Moon is not a good place for humans to be born and grow

Everything on Moon exist only for a short while

Everyone , ■■rything cycles too perfectly too fast

Janimes
JANIMES.COM

Nothing is ... permanent here.

Nothing is permanent in this world.

I was saying that to him..., but
I realized he did not mean it that way...

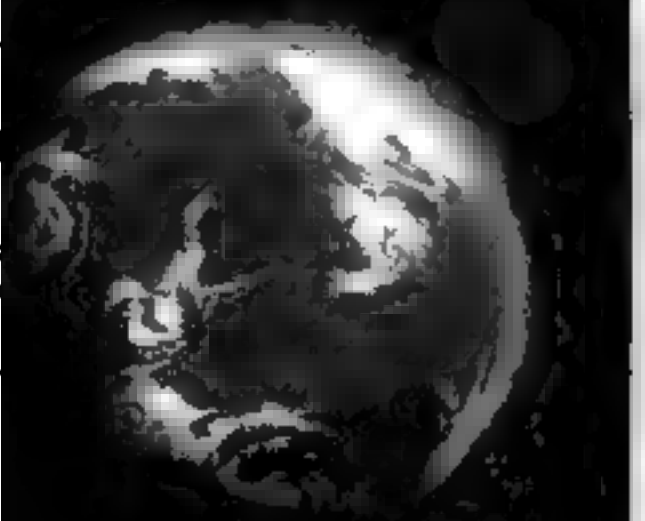
Even so

Your grandfather lasts forever, no ?

..

Yes, he is the only one.

Nothing lasts forever.
However, there are things that do last forever.



Among those that last forever, there are those that don't continue in its future.

I've never been to Moon.

I am not a moon child, and I don't know anything about how they live on Moon.

So, it is very hard for me to understand his view point and how he sees everything from perspective.

People, as long as they are human, have to leave others and move on at one point.

Still, playing a friend in a very limited time such as 2 ~ 3 years may be too short.

Nothing collects dust.

Everything, everyone moves on as if wind by an invisible rule.

They all go back to where they belong.

Yes...
It is pretty much impossible for me to understand his perspective from my perspective.

But...

I felt that we were friends. What did he feel then ?

Is it just that our definition of "friends" is simply different?

Mira !
We are about to begin !

Are you ready?
Are you ready for this ?

Um

I will be able to see you in person after this course.

But I wonder, does he even want to see me in person ?

I am a little nervous as well.

What if I make a mistake ?

Maybe, all he wants is just chat through a computer.

I often see the captain when I am out.

I greet her usually, but if she seems to be too busy, I simply ignore her.

I haven't talked to her much ever since the day we had the talk.

But I feel alright since I can talk to her anytime I want.

Like that, normally we are given equal chances.

It will be alright.
I am going to see you,
and that is my own will.

* Nevermind page 186. It was a mistake from naming pages.

Maybe, you are right.

Air wash is done, please proceed.

Once the inner hatch is closed and secured with a green light, please check your equipments.

I may never see you again once I go back to Earth with my mom just like everyone you've come across.

But... there may be something else between us.

Is it two teams at once ?

There may be something we have yet to realize.

I want to be your friend.

The outer hatch will open shortly. Team 1, be prepared.

I want to be someone who lasts forever.

So..., so...!

Mira of team 1 !
I am proceeding !

So, I am going to try.

You refuse me, so I am going to you in person.

I am going to see you physically.

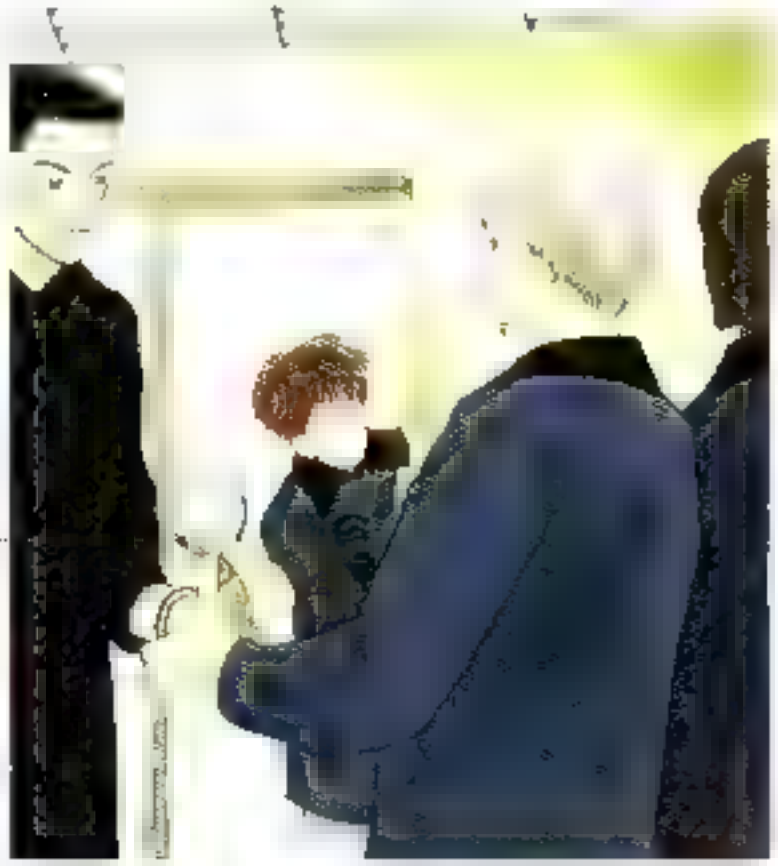
COSMO police Space police in other words

There are four "hired police" in Diotima. Hired police basically means just that. They are hired by CSC to look over public security of the station, Diotima. Lt. Lindgren is one of the four hired police.

They work on a week period before their next shift take over Replacements are generally from COSMO police Moon HQ.

It is rumored that COSMO police has been talking about building an official COSMO police station in Diotima. However, it hasn't happened yet

What Ms Lindgren is wearing is COSMO police uniform long coat version. It has huge logo on front and nothing else. Main weapon of COSMO police is electric batons. It is forbidden to carry any firearms of any sort, and punishment is severe.



A scene where a COSMO police arrests a criminal. The same method is used still.

월인(moonchild)

Moonchild refer to those who were born on Moon. Three moonchildren were sent to Earth on 2075, all of them died within 48 hours.
After the incident, giving birth on Moon became forbidden. On 2076, a law passed, forbidding anyone under 18 staying on Moon for too long.

In the current time line, 5 moonchildren exist, and Laterasa is the youngest one. No special abilites have been found from moonchildren, and it is strongly forbidden to perform any experiments on them.

Moonchildren live with their legal guardians on Moon, and their lives are financially supported.

우주선 가격 20세기의 우주 왕복선은 무게 1파운드(0.4536kg)당 1만 달러라는 고비용이 들었다. 그러나 21세기 말의 우주 셔틀과 여러 용도의 개인 우주선은 1파운드당 100달러~1천 달러로 많이 하향 조정되었다(물론 중고 우주선이나 터무니없이 고가의 자가용 우주선도 존재한다).

도킹 기술의 확립 현재(2092년)의 도킹 작업은 가히 예술이다 라고 감탄할 정도로 정확하며 부드럽게 진행된다. 디오티마처럼 소형의 우주 스테이션의 경우, 적어도 도킹 시작 20분 내에 도킹이 완료된다고 한다(빠르면 10분).

선 외 활동을 위한 질소 청소 시간 이것만은 거의 발전하지 못한 듯. 우주복의 기압은 우주선의 3분의 1정도로 낮아지기 때문에 우주복을 완전히 착용했다고 해서 곧바로 0 기압 상태로 우주로 진입했다가는 혈액에 녹아 있는 질소가 거품을 일으켜 위험해진다. 따라서 1 증간에 해당하는 70.3킬로파스칼에서 100%산소를 호흡함으로써 혈액 속의 질소를 청소해 주어야 한다. 이 과정이 약 40분 가량 걸린다.

디오티마의 직원 남녀 비율 남녀 비율은 여자 3.5 남자 6.5의 비율이다. 기본적으로 각 부서들의 남녀 구성비는 서로 비슷한데도 이런 수치가 나온 것은, 가장 다수를 차지하는 기술직(67명)에 여자 직원이 5명뿐인 것에 기인할 것이다. 같은 직급에 있어서 성별에 따른 연봉의 차이는 없고(디오티마 전 직원의 90%이상이 평사원이다) 주임의 경우 '주임 수당 이', 연봉에 합산되어 나온다.

디오티마의 직급 형태 스테이션 내의 직급 구성은 역참과 부역장을 제외한 거의 모든 직원이 횡적 구조를 이루고 있다(쉬운 예로, 학교에서 교장과 교감을 제외하고는 거의 모두가 평교사—라는 것을 떠올리면 이해가 쉬울 것이다). 각 부서의 주임 또한 공식적인 총적 직급은 아니며 편리에 의해 맡게 되는 직책으로 역장의 재량 하에 임명할 수 있다. 자잘한 직무가 늘어나므로 특별 수당이 붙는다.

직원 가족 부양 정책 디오티마의 직원들은 18세 이하의 자식에 한해서 우주 근무 기간 동안 디오티마의 개인 실에서 함께 상주할 수 있다. 이 상주 가능 가족은 배우자, 형제, 자매, 부모 모두 해당되지 않고 오로지 미성년의 자식일 경우에만 해당된다. 따라서 디오티마에는 미성년자를 위한 기본 학습 프로그램이 지원되고 있다.

용어 해설

라디에이터 우주선의 각종 장비들은 상당한 열을 발생시킨다. 냉장고에 있는 것과 비슷한 냉각 시스템이 화물칸 문에 붙어 있어 장비에서 나는 열을 흡수해 우주로 발산한다.

EVA 우주 비행사의 선 외 활동

Hm

One day,
GYO (The author)
has summoned all plot characters.

What's wrong? You don't look good.

Some headache I've had ever since childhood ..

나의 귀여움 신경세포와 노화백을 압박하고 있다고

Is that so ..

And sales of my books ... Korea has simply too many pirates.

몇년간 출판 연혁 산업은 개삽질한거 같아

알아서 창작

Don't use net words.

Additionally, my books aren't selling too well.

끗끗- 안됐네

그래도 어려전이 힘내

A lie !

Your books have never sold too well. That's why they become "out of print" so quick.y

Ah. shut it.

자신의 무능을 회고의 귀내 정해 묻고 술먹 불어 버리고 했대!

I know my books never sold well, but it's getting worse !!!!!!!

So, what are you expecting us to do?

우리집은 벌써 엄마가 한권 사왔어

나도 사기 싫었지만 샀다

You forced us to buy your book.

나도 싫어

.....

함장님 그건 딴 책이잖아요

I just ... wanted to ... whine ...

외로운 듯요옵

.....

You see ...

Lately ..., I've been forgetting things ...

Settings..., I am losing them bit by bit.

Even names are ... hazed.

it took me 4 min 20 sec to recall "Epolide", sorry.

빠직

You do remember my name still though..., don't you ?

I mean I am the vice captain and all ...

씨익

Let go of me ! I am going to kill him !

참아! 참아!

I just want to throw my fists onto that fat face of his !

케케케

O,rly !

Come on, face me !

케케캣!

이렇게 귀엽고 행복한 어린 소년을 때릴 테냐 !

폴짝 폴짝

...

Open the hatch.

끼잉

이번에야 말로

꾸에

Hic !

pant

나의 쿡트함에 넘어오지 않는 자들이 있을 줄이야

I would have become a giant super star if that happened.

I think he needs more beating.

I still have to draw an extra story like this even if the books don't sell well !

But I couldn't think of anything!

댁들이 이 고통을 알아?

Just fill up.

Yes, you already used 3 pages so far.

Why not just say few things about yourself ?

No one'd be interested though.

Just use some garbage.

Now, we will ask you few questions.

Little one, how are you doing ?

자 이걸 마이크라고 생각하고

Readers seem to be worried about your health.

Eh -

I ...

I, uh ...

I am not doing well !

What ?

What's the point of the spotlight ?

I am really busy looking after my 5 dogs and 20 birds.

I spend most of my time cleaning up their feces.

One day, one of my birds dropped its fect onto my keyboard.

Enough with that talk.

It's dirving me nuts !

And I ...

Wanted to draw background for Diotima better.

So, I've been trying to learn 3d MAX.

One day, I'd like to work in 3D animation field, but that's for far future !

Stop !

Page over.

휘어 휘어

Cut !

It's over. Now go work on volume 4.

Darn it !
